**The Economic Appraisal of Investment Projects at the EIB - 2nd Edition** European Investment Bank, 2023-05-03

The EIB performs economic appraisals of the projects it considers for investment. Thereby it ensures that projects add sufficient value to society to merit support. Beyond considerations of financial profitability to investors, the economic appraisal also addresses the wider value generated by the project to society. This comprises benefits and costs to project final users, the taxpayer and third parties, allowing for all applicable market failures such as environmental externalities. Since the publication of the first edition of this document in 2013, the EIB has been transformed into the EU Climate Bank. The way it values carbon emissions has been updated, as have various other elements of economic appraisal, in keeping with developments in the specialist literature, policy and practice. This second edition of the document gives the reader an updated view of how economic appraisal is currently conducted at the Bank. It also mentions the areas on which the EIB is currently working to ensure that it is at the forefront of economic appraisal practice. Project Valuation Techniques for

*Improving the Efficiency of Public Investment in Infrastructure* in Ed Hearne, 2025-03-26 Against a backdrop of constrained fiscal space Belgium faces considerable investment needs Improving infrastructure governance processes can enhance investment efficiency achieving more bang for each investment buck This paper analyzes public investment management practices in Belgium highlighting several areas for improvement by the federal and regional governments The findings indicate an absence of clear infrastructure strategies weak practices for project preparation including project appraisal selection and approval processes fragmented governance and an absence of coordination within and between entities The gatekeeping role of the Ministry of Finance common in most

advanced economies is largely absent in each of the entities in Belgium's federal state. Notwithstanding these areas for improvement, there are examples of good practices in individual agencies and a number of promising reform initiatives are underway. The paper recommends taking a strategic and coordinated approach to investment planning, establishing standardized project preparation practices, enhancing coordination between federated entities and with the federal entity, and strengthening the role of departments of finance budget in the public investment process. Together, these steps can improve infrastructure governance and support enhanced investment efficiency.
