places the author's work in its cultural and historical context. The book examines a sample of her vast output looking at five recurring themes: a sense of place, a sense of period, a sense of childhood, a sense of class, and a sense of fantasy. A survey of changing attitudes towards Blyton reveals contrasting ways of looking at her work and raises the question whether she was as reactionary a writer as she appeared.

Family Men Laura King, 2020-01-09 Fathers are often neglected in histories of family life in Britain. *Family Men* provides the first academic study of fathers and families in the period from the First World War to the end of the 1950s. It takes a thematic approach examining different aspects of fatherhood from the duties it encompassed to the ways in which it related to men's identities. The historical approach is socio-cultural; each chapter examines a wide range of historical source materials in order to analyse both cultural representations of fatherhood and related social norms as well as exploring the practices and experiences of individuals and families. It uncovers the debates surrounding parenting and family life and tells the stories of men and their children. While many historians have examined men's relationship to the home and family in histories of gender, family life, domestic spaces and class cultures, more generally few have specifically examined fathers as crucial family members, as historical actors and as emotional individuals. The history of fatherhood is extremely significant to contemporary debate: assumptions about fatherhood in the past are constantly used to support arguments about the state of fatherhood today and the need for change or otherwise in the future. Laura King charts men's changing experiences of fatherhood, suggesting that although the roles and responsibilities fulfilled by men did not shift rapidly, their relationships, position in the family and identities underwent significant change between the start of the First World War and the 1960s.
