

Safety Effects of Fixed Automated Spray Technology Systems

David Veneziano, Anburaj Muthumani, and Xianming Shi

Fixed automated spray technology (FAST) has emerged as a solution to provide quick, effective service delivery to high-risk locations prone to icy conditions or with high traffic volumes. The Colorado Department of Transportation has installed and used FAST on bridges since 1998, with 32 units currently installed on bridges around the state. There is some concern regarding the effectiveness of FAST in reducing accidents during winter weather. Previous studies of FAST have considered the changes in crash occurrence following deployment, but these studies were basic and compared seasonal figures or rates without accounting for site conditions. To address this shortcoming, an observational before–after study with the empirical Bayes technique was used to determine the effect of FAST systems on crash frequencies. The results revealed that at sites where crashes were reduced, FAST systems contributed to an annual reduction of 2% on multilane rural highways, 14% to 70% on urban Interstates, 31% to 57% on rural Interstates, and 19% to 40% on interchange ramps between Interstates. However, at some sites, safety deteriorated with an increase in crashes. Although the precise causes of such increases are not completely clear, they may have been the result of increased traffic, systems not being maintained properly, or systems applying fluids in improper amounts or at the wrong time. On the basis of the collective results, high-traffic, high-crash severity locations are most suitable for FAST deployment.

A recent review has revealed a consistent pattern in existing studies, that is, adverse winter weather increases crash frequencies on highways, reduces traffic speed, and lessens the chance of fatal crashes (1). During the winter, accidents often occur on bridge decks or shaded areas where the surface temperature tends to be lower than the adjacent areas and creates potentially hazardous driving conditions, such as frequent frost and black ice (2, 3). Fixed automated spray technology (FAST) has emerged as a solution to provide quick, effective service delivery to such high-risk locations prone to icy conditions or with high traffic volumes. FAST systems are designed as a fixed technology for anti-icing at target areas such as bridges, tunnels, ramps, and other elevated roadways (4). The challenges associated with the installation and operation of FAST systems are often site-specific (5). This technology is a permanent installation of a pump, tank, nozzles, and a controller for the application of anti-icing chemicals manually or automatically.

The Colorado Department of Transportation (DOT) has installed and used FAST on bridges since 1998, with 32 units currently installed

on bridges around the state. In areas where FAST has been deployed for several years, there is a favorable view of the system. However, there is some concern about how effective the system is in reducing accidents during winter weather events. The Colorado DOT's experience mirrors that of other agencies in North America and Europe, which have generated different views of effectiveness. Consequently, many transportation agencies still consider FAST as an evolving technology.

As one of the main objectives of FAST systems is to provide a safer driving surface through timelier chemical applications, it was necessary to determine whether safety improvements had been achieved through Colorado's deployments. Consequently, this work aimed to determine what changes had occurred in vehicle crash rates at the different FAST sites throughout Colorado. The objective of the study was to determine whether crashes had decreased in a statistical sense after different FAST deployments compared with the years before the deployments. Such an evaluation would provide a clearer picture of whether FAST systems had produced a positive impact on safety at each site.

LITERATURE REVIEW

Although FAST systems have been deployed around the world for a few decades, observations of crash reductions are somewhat limited. Gladbach discussed a FAST system that was installed in 1984 along a 3.7-mi (6 km), topographically and climatically challenging road section between Hagen and Lüdenscheid in Germany (6). Safety benefits were assessed by comparing the annual number of crashes caused by winter conditions (e.g., snow and icy patches) in two 7-year periods before and after installation. The number of crashes was reduced by 58% and traffic congestion was also reduced (6).

A FAST system was installed in Dover, United Kingdom, and operated for the 2010–2011 winter period. The system was located on Jubilee Way Bridge and designed to operate automatically or manually (7). No winter-related crash reduction data were reported, since the number of incidents on Jubilee Way was not sufficient to consider statistically following installation of the system.

The effectiveness of a FAST system installed on an interchange overpass on I-215 in Salt Lake City, Utah, was analyzed for the 1997–1998 winter season. Comparing the 1997–1998 winter season data with the five previous winters, a 64% reduction in snow and ice-related accidents was reported on the northbound lanes (2).

The first FAST system in Canada was installed along a 550-ft (168-m) interchange ramp with an average daily traffic of 3,000 vehicles in Ontario. No winter weather-related accidents had occurred since the FAST installation (as of 2001) (8).

A FAST system installed on a bridge on Interstate 68 in Allegany County, Maryland, in the 1998–1999 winter season reduced accidents

Fixed Automated Spray Technology August 19 2011 Introduction Introduction

In the digital age, access to information has become easier than ever before. The ability to download Fixed Automated Spray Technology August 19 2011 Introduction has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Fixed Automated Spray Technology August 19 2011 Introduction has opened up a world of possibilities. Downloading Fixed Automated Spray Technology August 19 2011 Introduction provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Fixed Automated Spray Technology August 19 2011 Introduction has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Fixed Automated Spray Technology August 19 2011 Introduction. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Fixed Automated Spray Technology August 19 2011 Introduction. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Fixed Automated Spray Technology August 19 2011 Introduction, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Fixed Automated Spray Technology August 19 2011 Introduction has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available

and embark on a journey of continuous learning and intellectual growth.

FAQs About Fixed Automated Spray Technology August 19 2011 Introduction Books

What is a Fixed Automated Spray Technology August 19 2011 Introduction PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Fixed Automated Spray Technology August 19 2011 Introduction PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Fixed Automated Spray Technology August 19 2011 Introduction PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Fixed Automated Spray Technology August 19 2011 Introduction PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Fixed Automated Spray Technology August 19 2011 Introduction PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
