 digitization come training and personnel implications This report discusses training issues associated with digitization
 specifically those that address a need to train and maintain backup along with digital skills Backup skills are the individual
 and collective skills required when digital systems are degraded or unavailable The study focused on the digital M1A2
 Abrams Main Battle training program as an exemplar Lessons learned about digital and backup training requirements should
 be applied in the M2A3 training program The study investigated issues that are applicable to a wide range of digital
 applications and training conditions The study examined individual and collective tasks that support tank operations and
 found both digital and backup tasks to be poorly defined particularly in collective performance A method for analysis is
 described and analytic results reported The study also outlines the current state of training armor and infantry soldiers and
 the impact that increased digitization may have on training pipelines The study employed a series of expert groups to define
 issues and formulate recommendations These groups included users developers researchers and trainers with a wide
 spectrum of experience and viewpoints Expert group results are reported and include 15 primary issues and accompanying
