Management and Money Management How to set your goals and how to reach them The various solutions that a new trader should consider to have a better chance of success Examples and demonstrations of real trades The objective of this book is to help beginners to achieve good success in Forex Trading through simple winning and risk management strategies This book will help traders to know how to deal with their mindset avoid common mistakes and help them to make a substantial income from the financial markets It will also help you to overcome all the obstacles and insecurities showing you how the world of Forex really works to deal with it with the right mentality If you are ready to know everything you need about Forex Trading to start achieving the desired results Scroll Up and Click the BUY NOW Button to Get Your Copy *Forex Trading For Beginners* Andrew Stock,2020-10-31 Do you want to learn the best forex trading tips and tricks If yes then keep reading This guide covers basic strategies for beginners explained in simple terms A ready to use guide to making money online Build your portfolio with tactics of day swing Forex Foreign Exchange Market is the biggest financial market in the world Therefore Forex trading refers to Currency exchange trading As you know it is extremely important for currencies to exist in this world Without them people will not be able to buy and sell goods Now these goods will not always be bought and sold in the local country alone and will also have to be bought from a foreign country Now say for example your line in Germany and wish to buy a laptop from China The German currency is Euro and Chinese currency is Yuan Now when you wish to buy the laptop the Chinese seller will most likely not accept the Euro as payment but would accept Dollars as up until now Dollars is the most widely accepted currency and easy to convert into Yuan as he will want the Yuan which is the ultimately currency he will want in his bank account in China So you will have to exchange your Euro for Dollars to pay the Chinese seller Here you have to understand that the currency will get converted to certain Exchange rate quoted by the market at the time the conversion occurs This rate will always be a difference in the values of the currencies This difference will always prove to be an advantage for one country and a disadvantage to another in ways that we could analyze in the future Now say 1 Euro is valued at 20 Yuan This means that the German trader can exchange 1 Euro for 20 Yuan and 100 Euro for 2000 Yuan Here the Yuan trails the Euro which means that Germany is in a better place in terms of forex trading On the other hand if a trader in China were to buy wine from Germany then he would have to pay a lot more towards it due to the difference in rates between the two currencies This is just an example and the difference in rates can be quite different from this It can be higher or lower in value Now here a buyer wanted to exchange the money because they wished to buy something from a foreign seller but Forex is not always traded for this reason alone It is also traded to capitalize upon the difference in values You could be able to make big profits if you play the game right but there are certain things that you must learn about first in order to invest in the Forex market Through the course of this book we will look in detail at how you can do so In this next segment we will look at the basic concepts of forex trading This book gives a comprehensive guide on the following Making money in the forex market Easy ways to reduce your risks Influencers of the forex markets Trend reversal figures Forex strategy basics
