

Writing Lab Reports & APA Format

Structure and Content of a Laboratory Report

This following provides a brief overview of the structure and content of various elements in a laboratory report, based on APA guidelines. The APA publication manual can be referred to for more detail.

The purpose of a lab report is to communicate research in a clear, systematic and standardised way. Primarily, a lab report should communicate the following things:

- **Why did I bother?** Why did I do this experiment and why is it an interesting contribution to science?
- **How did I do it?** How did I carry out this research (this should be detailed enough so that the experiment could be replicated precisely)?
- **What did I find?** what were the results of your study?
- **So what?** what do your findings mean in terms of your hypotheses and what theoretical contribution do they make?

IMPORTANT!

The advice that we give you in this handout is not inflexible, it is a guide! For example, when we say that the title should be fewer than 15 words, the world will not end if your title is 16 words. So, please use your common sense. In case you don't have any, the snail of sense will appear to give you some advice.

Format

There are several sections to a lab report:

- Title
- Abstract
- Introduction
- Method
