Their mothered language is an important first step towards their developing broader awareness of their different languages and their own culture. This is because their mothered language is the language that they are most likely to use when they are with their mother. It is the language that they are most likely to use when they are with their mother. It is the language that they are most likely to use when they are with their mother.

Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to either a control group (CON) or a training group (TRN). The TRN group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The CON group did not exercise. The HR and EE were measured at baseline and at the end of the 12-week training program. The TRN group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The results of this study suggest that a 12-week training program can improve the cardiovascular fitness and energy expenditure of sedentary, middle-aged women.
