## **Words And Buildings A Vocabulary Of Modern Architecture:**

**Words and Buildings** Adrian Forty, 2004 Available again a wholly original study of the complex relationship between architecture and language that has changed and enriched the way we think and talk about architecture The words we use when we talk and write about architecture describe more than just bricks and mortar they direct the ways we think of and live with buildings This groundbreaking book is the first thorough examination of the complex relationship between architecture and language as intricate social practices Six rigorously argued chapters investigate the language of modernism language and drawing masculine and feminine architecture language metaphors science in architecture and the social properties of architecture There follows a vocabulary of key words such as Character Form History and Space locating each words modern meaning within an historical and theoretical framework and setting out clearly its development and relevance for architects historians philosophers critics and the users of the buildings themselves Architects should be made to read Words and Buildings Architecture Today Unusually clear and accessible Students of all kinds will love this book The Architectural Review A forceful clear and sophisticated exposition of the role of conceptual thought in architectural discourse The Architects Journal

**Words and Buildings** Adrian Forty, 2000 **Architecture Depends** Jeremy Till, 2009 Architects however tend to deny this fearing contingency and preferring to pursue perfection *Architektur- und Planungsethik* Karsten Berr, 2016-12-15 Die Autoren dieses Bandes eröffnen Zugänge Perspektiven und Standpunkte zu einer Architektur und Planungsethik für Menschen in einer bebauten und bewohnten Welt die auch in Zukunft bewohnbar bleiben soll Den Beitrag ist gemeinsam dass sie von einer konkreten Praxis ausgehen und zeigen welche ethisch relevanten Aspekte mit dem Handeln der Akteure verbunden sind oder mit welchen moralischen Herausforderungen dieses Handeln konfrontiert wird In einem ersten Zugriff werden Zugänge zu moralischen ethischen und politischen Aspekten der Planung identifiziert und für weitere architektur und planungsethische Überlegungen erschlossen Anschließend werden grundlegende begriffliche und theoretische Perspektiven einer Architektur und Planungsethik aus lebensweltlichen Erfahrungen oder Handlungen der Akteure oder der Eigenlogik architektonischer Entwürfs und Planungsprozesse entwickelt Abschließend wird das heikle Verhältnis des ästhetischen und Moralischen innerhalb architektur und planungsethischer Überlegungen begrifflich präzisiert und mit neuen Argumenten gewichtet

*The Emergence of the Interior* Charles Rice, 2006-11-22 Taking a radical position counter to many previous histories and theories of the interior domesticity and the home The Emergence of the Interior considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image based condition Incorporating perspectives from architecture critical history and theory and psychoanalysis The Emergence of the Interior will be of interest to

academics and students of the history and theory of architecture and design social history and cultural studies

**Landscape Theory in Design** Susan Herrington, 2016-12-08 Phenomenology Materiality Cybernetics Palimpsest Cyborgs Landscape Urbanism Typology Semiotics Deconstruction the minefield of theoretical ideas that students must navigate today can be utterly confusing and how do these theories translate to the design studio Landscape Theory in Design introduces theoretical ideas to students without the use of jargon or an assumption of extensive knowledge in other fields and in doing so links these ideas to the processes of design In five thematic chapters Susan Herrington explains the theoretic groundings of the theory of philosophy why it matters to design an example of the theory in a work of landscape architecture from the twentieth and twenty first centuries debates surrounding the theory particularly as they elaborate modern and postmodern thought and primary readings that can be read as companions to her text An extensive glossary of theoretical terms also adds a vital contribution to students comprehension of theories relevant to the design of landscapes and gardens Covering the design of over 40 landscape architects architects and designers in 111 distinct projects from 20 different countries Landscape Theory in Design is essential reading for any student of the landscape *Site Matters* Carol Burns, Andrea Kahn, 2005-07-08 One of the trends in twentieth century architecture and planning has been to denigrate and ignore the site or larger context both physical and social surrounding a building or set of buildings Focussing on Le Corbusier's designs Site Matters presents that first considered theory and vocabulary for the inevitable reaction against Modernism in planning beginning in the 1960s and swelling through the 1980s as architects and planners alike developed a new appreciation of site reincorporating the wider context into their plans Theoretical essays and empirically grounded pieces combine to provide the language and theory of this re emergence of site looking at Le Corbusier's designs contemporary suburbs and the planning agendas involved at the World Trade Center site Groundbreaking and innovative Site Matters provides valuable theory and vocabulary for planners and architects Convergent Flux Jinhee Park, John Hong, 2012-11-05 Convergent Flux illustrates the contemporary architectural and urban planning developments in South Korea in the context of the country's considerable urban density In recent years South Korea which long stood in the shadow of the superpowers Japan and China has surged in economic terms That said industrialization and the population explosion connected with it have created enormous challenges for the country at the interface between globalization and cultural identity Some 10.5 million inhabitants live in the center of the capital Seoul while the metropolitan area includes around 25 million residents making it the second largest conurbation in the world after Tokyo The result is high urban density which spells an enormous demand for the more efficient use of space and encourages verticalization in architecture The publication outlines the current developments in South Korean architecture urban development and landscape architecture by examining 32 projects in detail An in depth view of contemporary South Korean architecture is given by five essays that address topics such as the fusion of tradition and the modern the re defining of so called social spaces and the country's special

topographical situation The authors are both architects trained at the Harvard Graduate School of Design *Zufall und Vision* Dietrich Neumann, 2020-11-23 Die Geschichte des Barcelona Pavilons Mies van der Rohe entwarf mit dem temporären Ausstellungspavillon des Deutschen Reichs auf der Weltausstellung 1929 in Barcelona eine Ikone der Architektur aber auch ein umstrittenes Monument der Selbstdarstellung der Weimarer Republik Das Gebäude gehört zu den ungewöhnlichsten Erfolgsgeschichten in der Architektur Trotz seiner kurzen Existenz wuchs sein Ansehen in den folgenden Jahrzehnten stetig auch dank großartiger Fotografien Bald galt es als gebautes Manifest der Moderne ihrer räumlichen und ideellen Ambitionen als ein Meilenstein der modernen Architektur Ausführlich und weitreichend recherchiert stellt das vorliegende Buch seine komplexe Geschichte und seine politische Verwicklung dar bis hin zu seiner Rekonstruktion zwischen 1983 und 1986 nach den Originalplänen am ursprünglichen Ort Die wohl wichtigste und einflussreichste Architekturikone des 20. Jahrhunderts einzigartig dokumentiert und dargestellt Zahlreiche unveröffentlichte Fotografien aus Archiven in USA Deutschland und Spanien The Urban Vernacular in Southeast Asia Nor Zalina Harun, Shireen Jahn Kassim, 2025-05-16 This book constructs a number of discourses dialectics and analyses across the disciplines of urban form architecture and urban experience thus incorporating both conservation and design issues It bridges the gap between practice and theory by reconstructing the role of the village or vernacular in the discourses and trends of the twenty first century post Covid19 environment Bringing together for the first time the confluences of theory and practice in the urban vernacular and the urban village the contributors use vernacular concepts and settings as a common framework serving as cultural bridges connecting traditional forms ecologies and habitats to new global ideas industrial economies and access to developing urban sustainability design planning and services in Asia's rising megacities The book begins with concerns of urban layout and morphology aiming to establish discourse shared principles and terminology around conventional ideas of the village or traditional settlements apparently organic and disordered nature It then moves into architectural dimensions capturing formal cases of how the vernacular or traditional indigenous local concepts have inspired new ideas in award winning architecture and hence the importance of re-examining the vernacular in light of the ongoing need to produce a more sustainable and place conscious fit in modern architecture and urban planning The book will be of interest to researchers in the fields of architecture urban planning and design urban geography design studies landscape architecture history of architecture urbanism and Asian Studies in particular those concerning Southeast Asia Precision in Architecture Mhairi McVicar, 2019-05-13 This book offers a detailed insight into the desire for and consequences of precise communications in the daily life of contemporary architectural practice through close readings of constructed architectural details by Sigurd Lewerentz Caruso St John Architects Mies van der Rohe and OMA In the professionalised context of the contemporary architectural profession precise communications drawings specifications letters faxes and emails are charged with the complex task of translating architectural intent into a neutral and quantifiable language which is expected to guarantee an exact match between the

architects intentions and the constructed result Yet as any architectural practitioner will know it is doubtful whether the construction of any architectural project may ever exactly match all written and drawn predictions This book challenges claims to certainty which have been attributed to such communications from the mid nineteenth century onwards and critiques ongoing expectations of certainty in contemporary architectural production **Region** Simon Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them **Theorie der Architektur** Sebastian Feldhusen, Ute Poerschke, 2017-09-25 Die Theorie der Architektur bringt als Forschungsfeld so vielfältige Disziplinen wie Anthropologie Architektur und Kunstgeschichte Architektur und Kunsttheorie Linguistik Philologie Philosophie Psychologie Soziologie und Urbanistik in ein Gespräch über Architektur zusammen 24 Autoren präsentieren zeitgenössische Positionen zur Theorie der Architektur die in drei Kapiteln nach ihren verschiedenen Untersuchungsgegenständen geordnet sind Begriffe Diskurse Ideen Dinge Räume Bauten Praktiken Erfahrungen Aneignungen Das Buch erscheint zu Ehren des Architekturtheoretikers Eduard Föhr Die Autoren Böhlinger de Bruyn Dreyer Feldhusen Friesen Föhr Gleiter Genter Hahn Harries Hasse Janson Lampugnani Leatherbarrow Miller Moravcsik Neumeyer Oechslin Pérez Gómez Poerschke Sieverts Staub Wagner Waldenfels **A Field Guide to a New Meta-field** Barbara Maria Stafford, 2011-06 Includes bibliographical references and index **The Rise of Awards in Architecture** Jean-Pierre Chupin, Carmela Cucuzzella, Georges Adamczyk, 2022-09-06 This book is the first scientific study to focus on awards in architecture and the built environment investigating their exponential growth since the 1980s The celebration of excellence in architecture and related fields remains a phenomenon on which there is strangely little scientific scrutiny What is to be understood from the plethora of award winning projects award winning buildings and awarded professional practices in the built environment year after year Glossy images partake in an intense ballet at every local regional national or international award ceremony and they are meant to embody proofs of architectural excellence However it is necessary to take a critical distance to

question what awards are meant to embody symbolize and perhaps measure Each of the 10 chapters in this volume is centered on one question related to themes as varied as the comparison of Pritzker and Nobel Prizes the Prix de Rome the redefinition of quality through awards green awards and sustainability the multiplication of sustainable awards heritage awards architecture book awards the awarding of school architecture awards as mediations and awards as pedagogical devices Many fields once consolidated have featured a sharp increase in related prizes The original data compiled and summarized in 4 appendices cover more than 150 award granting organizations in some 30 countries Our inventory includes upwards of 24 000 prizes awarded at more than 3 100 events the earliest of which is the first instance of Western architecture s seminal Grand Prix de Rome in France in 1720 A history of contemporary architecture is thus written through press releases that praise the merits of the heroes as much as their works and achievements And while awards can be vehicles that propel architecture forward they can also be Trojan horses in an era that is constantly on the lookout for event driven products small and big news and brand imaging

**Nelson Goodman and Modern Architecture** Kasper Lægning, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman s aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman s aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman s concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman s framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

[The Autopoiesis of Architecture, Volume I](#) Patrik Schumacher, 2011-04-20 Take a theoretical approach to architecture with [The Autopoiesis of Architecture](#) which presents the topic as a discipline with its own unique logic Architecture s conception of itself is addressed as well as its development within wider contemporary society Author Patrik Schumacher offers innovative treatment that enriches architectural theory with a coordinated arsenal of concepts facilitating both detailed analysis and insightful comparisons with other domains such as art science and politics He explores how the various modes of communication comprising architecture depend upon each other combine and form a unique subsystem of society that co evolves with other important autopoietic subsystems like art science politics and the economy The first of two volumes that

together present a comprehensive account of architecture's autopoiesis this book elaborates the theory of architecture's autopoiesis in 8 parts 50 sections and 200 chapters Each of the 50 sections poses a thesis drawing a central message from the insights articulated within the respective section The 200 chapters are gathering and sorting the accumulated intelligence of the discipline according to the new conceptual framework adopted in order to catalyze and elaborate the new formulations and insights that are then encapsulated in the theses However while the theoretical work in the text of the chapters relies on the rigorous build up of a new theoretical language the theses are written in ordinary language with the theoretical concepts placed in brackets The full list of the 50 theses affords a convenient summary printed as appendix at the end of the book The second volume completes the analysis of the discourse and further proposes a new agenda for contemporary architecture in response to the challenges and opportunities that confront architectural design within the context of current societal and technological developments

*On Bramante* Pier Paolo Tamburelli, 2022-05-10 A new interpretation of the work of Bramante suggesting an agenda for contemporary architectural practice In *On Bramante* architect Pier Paolo Tamburelli considers the work of the celebrated Italian Renaissance architect Donato Bramante and through this reappraisal suggests a possible agenda for current architectural practice Bramante Tamburelli argues offers an excellent starting point to imagine a contemporary theory of space to reflect on the relationship between architecture and politics and to look back with neither nostalgia nor contempt at the tradition of Western classicism Starting from a discussion of the difference in the work of Bramante in Milan 1481 1499 and Rome 1499 1514 Tamburelli highlights the peculiarities of Bramante's architecture especially in comparison to that of his predecessor Leon Battista Alberti and successor Andrea Palladio This in turn opens up new possibilities for appreciating his spatial experiments and to derive from Bramante's abstraction and disassociation of form from function a revised theory of space for contemporary architecture Such a theory might even advance a newfound political understanding of classicism and a model perhaps more valid now than ever before for a public architecture The text is bookended by a series of color photographic plates of Bramante's works by photographer Bas Princen

*Forty Ways to Think About Architecture* Iain Borden, Murray Fraser, Barbara Penner, 2015-03-11 How do we think about architecture historically and theoretically *Forty Ways to Think about Architecture* provides an introduction to some of the wide ranging ways in which architectural history and theory are being approached today The inspiration for this project is the work of Adrian Forty Professor of Architectural History at the Bartlett School of Architecture University College London UCL who has been internationally renowned as the UK's leading academic in the discipline for 40 years Forty's many publications notably *Objects of Desire* 1986 *Words and Buildings* 2000 and *Concrete and Culture* 2012 have been crucial to opening up new approaches to architectural history and theory and have helped to establish entirely new areas of study His teaching at The Bartlett has enthused a new generation about the exciting possibilities of architectural history and theory as a field This collection takes in a total of 40 essays covering key subjects ranging from memory and heritage to everyday life

building materials and city spaces As well as critical theory philosophy literature and experimental design it refers to more immediate and topical issues in the built environment such as globalisation localism regeneration and ecologies Concise and engaging entries reflect on architecture from a range of perspectives Contributors include eminent historians and theorists from elsewhere such as Jean Louis Cohen Briony Fer Hilde Heynen Mary McLeod Griselda Pollock Penny Sparke and Anthony Vidler as well as Forty's colleagues from the Bartlett School of Architecture including Iain Borden Murray Fraser Peter Hall Barbara Penner Jane Rendell and Andrew Saint Forty Ways to Think about Architecture also features contributions from distinguished architects such as Tony Fretton Jeremy Till and Sarah Wigglesworth and well known critics and architectural writers such as Tom Dyckhoff William Menking and Thomas Weaver Many of the contributors are former students of Adrian Forty Through these diverse essays readers are encouraged to think about how architectural history and theory relates to their own research and design practices thus using the work of Adrian Forty as a catalyst for fresh and innovative thinking about architecture as a subject

*Metaphorical Practices in Architecture* Sarah Borree, Stephanie Knuth, Moritz Röger, 2023-06-23 Metaphors are diversely and intricately embedded in architectural practice and discourse Precisely for this reason this volume argues and sets out to explore how they can be engaged to critically interrogate architecture's social cultural and political dimensions past and present and to productively challenge and intervene with established perspectives debates and practices Mapping out not just potentials but also addressing the challenges limitations and dangers inherent in using metaphors in architectural research and practice the volume prominently illustrates the ambiguity and contradictoriness inherent in both metaphors and the process of engaging and exploiting them Covering a broad range of historical and geographical cases and concerns the contributions illustrate effectively that metaphors can expand or narrow our engagement with architecture and consolidate or legitimise but also destabilise and challenge established social cultural disciplinary and political structures concepts and categories With its aim to explore metaphors as both subject and method to critically challenge and expand established practices perspectives and standards in architectural research and practice the volume will be of interest for scholars working across the architectural humanities including architectural history theory culture design and urbanism as well as for researchers concerned with architecture and the city from fields such as cultural visual and area studies as well as art history
