Overcoming Data Scarcity in Earth Science Angela Gorgoglione,Alberto Castro Casales,Christian Chreties Ceriani,Lorena Etcheverry Venturini,2020-05-22 heavily Environmental mathematical models represent one of the key aids for scientists to forecast create and evaluate complex scenarios These models rely on the data collected by direct field observations However assembly of a functional and comprehensive dataset for any environmental variable is difficult mainly because of i the high cost of the monitoring campaigns and ii the low reliability of measurements e g due to occurrences of equipment malfunctions and or issues related to equipment location The lack of a sufficient amount of Earth science data may induce an inadequate representation of the response s complexity in any environmental system to any type of input change both natural and human induced In such a case before undertaking expensive studies to gather and analyze additional data it is reasonable to first understand what enhancement in estimates of system performance would result if all the available data could be well exploited Missing data imputation is an important task in cases where it is crucial to use all available data and not discard records with missing values Different approaches are available to deal with missing data Traditional statistical data completion methods are used in different domains to deal with single and multiple imputation problems More recently machine learning techniques such as clustering and classification have been proposed to complete missing data This book showcases the body of knowledge that is aimed at improving the capacity to exploit the available data to better represent understand predict and manage the behavior of environmental systems at all practical scales

Solid-Earth Sciences and Society National Research Council,Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee on the Status and Research Objectives in the Solid-Earth Sciences,1993-02-01 As environmental problems move upward on the public agenda our knowledge of the earth s systems and how to sustain the habitability of our world becomes more critical This volume reports on the state of earth science and outlines a research agenda with priorities keyed to the real world challenges facing human society The product of four years of development with input from more than 200 earth science specialists the volume offers a wealth of historical background and current information on Plate tectonics volcanism and other heat generated earth processes Evolution of our global environment and of life itself as revealed in the fossil record Human exploitation of water fossil fuels and minerals Interaction between human populations and the earth s surface discussing the role we play in earth s systems and the dangers we face from natural hazards such as earthquakes and landslides This volume offers a comprehensive look at how earth science is currently practiced and what should be done to train professionals and adequately equip them to find the answers necessary to manage more effectively the earth s systems This well organized and practical book will be of immediate interest to solid earth scientists researchers and college and high school faculty as well as policymakers in the environmental arena

Basic Research Opportunities in Earth Science National Research Council,Commission on Geosciences, Environment, and Resources,Board on Earth Sciences and

Resources, Committee on Basic Research Opportunities in the Earth Sciences, 2001-02-01 Basic Research Opportunities in Earth Science identifies areas of high priority research within the purview of the Earth Science Division of the National Science Foundation assesses cross disciplinary connections and discusses the linkages between basic research and societal needs Opportunities in Earth science have been opened up by major improvements in techniques for reading the geological record of terrestrial change capabilities for observing active processes in the present day Earth and computational technologies for realistic simulations of dynamic geosystems This book examines six specific areas in which the opportunities for basic research are especially compelling including integrative studies of the near surface environment the Critical Zone geobiology Earth and planetary materials investigations of the continents studies of Earth's deep interior and planetary science It concludes with a discussion of mechanisms for exploiting these research opportunities including EarthScope natural laboratories and partnerships *Foundations for Sustainability* Daniel A. Fiscus, Brian D. Fath, 2018-11-16

Foundations for Sustainability A Coherent Framework of Life Environment Relations challenges existing assumptions on environmental issues and lays the groundwork for a new paradigm bringing a greater understanding of what is needed to help create an environmentally and economically sustainable future which to date has been an uphill battle and not an obvious choice The book presents the case for a paradigm based on a multi model of life as organism life as ecosystem and life as biosphere as opposed to the singular assumption that life can be viewed solely as an organism All backed with well cited research from top investigators from around the world this book is a must have resource for anyone working in ecology environmental science or sustainability Introduces a holistic systemic approach and a synthesis of the systemic root cause that underlies many surface symptoms that are part of individual environmental problems climate water energy etc Complements current piecemeal approaches in order to solve many interconnected environmental problems which share root causes Provides tests and thought experiments to challenge current views on sustainability leveraging the power of critical thinking to find new solutions Gives insights on how to find solutions by blending interdisciplinary and transdisciplinary focuses with disciplinary specialization in ecology and ecosystem science Bridges concepts and methods from math to ecology to human development *Big Data* Hassan A. Karimi, 2014-02-18 Big data has always been a major challenge in geoinformatics as geospatial data come in various types and formats new geospatial data are acquired very fast and geospatial databases are inherently very large And while there have been advances in hardware and software for handling big data they often fall short of handling geospatial big data ef *The Earth Observer*, 1995 **Getting the Climate Science Facts Right** Medani P. Bhandari, 2022-09-01 Getting the Climate Science Facts Right discusses climate change science with reference to the Intergovernmental Panel on Climate Change IPCC Addressing climate change is the most important public priority of the 21st Century Unlike many issues however this issue is being driven by both science and its interface with politics The main institution for bridging this division between science and international politics is the IPCC As

such it is the main source of the facts from which climate change policy is developed This book describes the ways in which the IPCC arrives at these facts and so can be sure they are complete and evidence based Seldom in history has science had such a direct relationship with politics The negotiation of an international policy regime requires at its outset an agreement on the facts In this case the facts are scientific complex and contentious Governments have recognized this and have by using the IPCC set up institutional machinery to provide facts from a source and in a manner that they can accept The way in which the IPCC functions is unique in that it melds the way in which science achieves consensus with the way governments do at the international level Starting with a process to examine review and debate scientific findings leading to a consensus about scientific fact usually expressed as probabilities that the findings will hold over time the IPCC then concludes by using the kind of consensus development mechanism that the United Nations typically uses to achieve agreements leading to the formation of policy regimes The book examines the structure of the IPCC its composition and its procedures in order to achieve an understanding of its role and future

National Spatial Data Infrastructure Partnership Programs

National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Mapping Science Committee, 2001-01-01 The National Spatial Data Infrastructure NSDI was envisioned as a way of enhancing the accessibility communication and use of geospatial data to support a wide variety of decisions at all levels of society The goals of the NSDI are to reduce redundancy in geospatial data creation and maintenance reduce the costs of geospatial data creation and maintenance improve access to geospatial data and improve the accuracy of geospatial data used by the broader community At the core of the NSDI is the concept of partnerships or collaborations between different agencies corporations institutions and levels of government In a previous report the Mapping Science Committee MSC defined a partnership as a joint activity of federal and state agencies involving one or more agencies as joint principals focusing on geographic information The concept of partnerships was built on the foundation of shared responsibilities shared costs shared benefits and shared control Partnerships are designed to share the costs of creation and maintenance of geospatial data seeking to avoid unnecessary duplication and to make it possible for data collected by one agency at a high level of spatial detail to be used by another agency in more generalized form Over the past seven years a series of funding programs administered by the Federal Geographic Data Committee FGDC has stimulated the creation of such partnerships and thereby promoted the objectives of the NSDI by raising awareness of the need for a coordinated national approach to geospatial data creation maintenance and use They include the NSDI Cooperative Agreements Program the Framework Demonstration Projects Program the Community Demonstration Projects and the Community Federal Information Partnerships proposal This report assesses the success of the FGDC partnership programs that have been established between the federal government and state and local government industry and academic communities in promoting the objectives of the National Spatial Data Infrastructure

Hayward,2020-04-29 An earnest young boy who loves nature grows up the son of a fundamentalist pastor He goes to college trains as a biologist and becomes a successful university professor In the process he finds some of the religious beliefs that carried him through childhood and adolescence indefensible in the face of evidence from biology and geology and even from Scripture itself What s he to do This is the journey of a boy turned scientist who finds a path away from the idols of fundamentalism and toward a universe rich with process intrigue and mystery Along the way he discovers a faith consistent with physical reality one open to beauty kindness and hope *Ward Valley* National Research Council,Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee to Review Specific Scientific and Technical Safety Issues Related to the Ward Valley, California Low-Level Radioactive Waste Site,1995-06-10 The book examines specific scientific and technical safety issues related to the proposed low level radioactive waste site at Ward Valley California It includes among other issues evaluation of the potential for infiltration by shallow subsurface water contamination of ground water and the Colorado River damaging effects on the desert tortoise habitat and restoration of the native vegetation **Handbook of Distance Education** Michael Grahame Moore,2013-05-07 The third edition of this award winning Handbook continues the mission of its predecessors to provide a comprehensive compendium of research in all aspects of distance education arguably the most significant development in education over the past three decades While the book deals with education that uses technology the focus is on teaching and learning and how its management can be facilitated through technology Key features include Comprehensive coverage that includes all aspects of distance education including design instruction management policy and a section on different audiences Chapter authors frame their topic in terms of empirical research past and present and discuss the nature of current practice in terms of that research Future research needs are discussed in relation to both confirmed practice and recent changes in the field Section one provides a unique review of the theories that support distance education pedagogy Section six includes a unique review of distance education as a component of global culture This book will be of interest to anyone engaged in distance education at any level It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments Recipient of the 2013 IAP Distance Education Book Award Intellectual Property and Development Rami M. Olwan,2013-03-15 The book examines the correlation between Intellectual Property Law notably copyright on the one hand and social and economic development on the other The main focus of the initial overview is on historical legal economic and cultural aspects Building on that the work subsequently investigates how intellectual property systems have to be designed in order to foster social and economic growth in developing countries and puts forward theoretical and practical solutions that should be considered and implemented by policy makers legal experts and the World Intellectual Property Organization WIPO **Geoinformatics** A. Krishna Sinha,2006-01-01 The science of informatics in the broadest sense has been several thousands of years in the making With

the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries Coupling this computational capability with earth science data defines the emerging field of geoinformatics Since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology As disciplinary information about Earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems Twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology Readers will readily recognize the vast intellectual content represented by these papers as they seek to address the core research goals of geoinformatics Publisher s website

Navigating the Complexity Across the Peace-Sustainability-Climate Security Nexus Bernard Amadei,2023-11-28 Promoting peace and sustainability in human development while accounting for the risks associated with the impact of climate change on society has become more imperative than ever when addressing humanity s challenges of the twenty first century There is enough evidence that peace sustainability and climate security are entangled with multiple complex interactions and cannot be dealt with in isolation and independently from the environment and the numerous systems with which they interact Yet the intersection of peace sustainability and climate security or their opposites i e conflict unsustainability and climate vulnerability is rarely articulated with a systemic mindset A multi solving nexus approach is more appropriate to capture the complexity and uncertainty of how the three sectors of peace sustainability and climate security play a role in community development the nature of their causal chains and the feedback on how community development affects the three sectors Navigating the Complexity Across the Peace Sustainability Climate Security Nexus explores the value proposition of using a systems approach methodology and tools to comprehend and model that dynamic Features of the book Explores the interaction between the different components of peace and the relationship between peace sustainability and climate security using semi qualitative and quantitative tools Explains how climate adaptation and mitigation are related to peace or conflict Presents generic system dynamics modeling that can be used in different contexts

Dialogues on Climate Justice Stephen M. Gardiner,Arthur Obst,2022-09-26 Written both for general readers and college students Dialogues on Climate Justice provides an engaging philosophical introduction to climate justice and should be of interest to anyone wanting to think seriously about the climate crisis The story follows the life and conversations of Hope a fictional protagonist whose life is shaped by a terrifyingly real problem climate change From the election of Donald Trump in 2016 until the 2060s the book documents Hope s discussions with a diverse cast of characters As she ages her conversations move from establishing the nature of the problem to engaging with climate skepticism to exploring her own climate responsibilities through managing contentious international negotiations to considering big technological fixes and finally as an older woman to reflecting with her granddaughter on

what one generation owes another Following a philosophical tradition established by Plato more than two thousand years ago these dialogues are not only philosophically substantive and carefully argued but also distinctly human The differing perspectives on display mirror those involved in real world climate dialogues going on today Key Features Written in an engaging dialogue form which includes characterization clear exchanges of ideas and a compelling story arc Clearly organized to allow readers both in depth consideration and rapid overviews of various topics Memorable examples that enable and encourage discussion inside and outside the classroom An Introduction to the book aimed at instructors which includes helpful instructions for teaching the book and engaging student assignments

Industrial Consumption and Transformation of Nature: Impacts on Global Ecosystems and Life Hubert

Engelbrecht, 2017-12-20 Anthropogenic changes in the environment caused by 250 years of economic growth and utilization of fuel and mineral resources have considerably impacted the natural environment. The resulting physical and chemical alterations to the Earth's sphere and our adaptive responses in the biosphere are detailed in this reference book. Readers will learn about concepts relevant to Earth's history, the evolution of life, economy, ecology, environmental history, biology, and medicine, and how these concepts can be linked to environmental change. The scope of this interdisciplinary work entails to convey the true degree of responsibility for the universal consequences of ecosystem degradation resulting from industrial processing, human consumption, and the transformation of natural sites due to industrialization and urbanization. Topics covered in the book include ecosystem transformations by natural and anthropogenic forces, the Anthropocene epoch, a short history of industrialization, environmental sites, and the impact of socio-economic influences, the current environmental crisis. This textbook is intended for graduate students in economics, civil engineering, architecture, agronomy, forestry, technical and mining sciences, political sciences, business studies, and humanities. General readers who wish to understand the basic philosophy behind environmental studies and their relation to human activity can also benefit from this book.
