area in the form of a literature review The literature review explains the origins of the 4PL concept as well as functions performed by a 4PL provider Different types of 4PL providers and inter organisational set ups are presented Afterwards the main areas of discussion are identified Areas such as outsourcing theory and channel concepts have relevance and are dealt with as well Although the 4PL basics are not necessarily country specific the literature review relies heavily on German sources In Chapter 3 a conceptual model concerning the topic is presented and hypotheses are developed In order to test the developed hypotheses primary data is collected in the form of a Delphi expert discussion This process is described in detail in Chapter 4 The logistics experts for the panel are drawn from shippers service providers and researchers the discussion consists of two rounds The results of the Delphi process are analysed in Chapter 5 followed by Chapter 6 in which the hypotheses are tested and conclusions are drawn The findings can be summarised by stating that the panellists generally expressed very pragmatic viewpoints Further several of the often quoted arguments in the 4PL discussion were weakened by the findings At the same time it has to be mentioned that especially the shippers were often split in their opinions This thesis does not aim at ending the 4PL discussion but instead hopes to fuel it by looking at certain aspects from different viewpoints
