Dietl, Karl W. Flessa, 2017-11-17 In conservation perhaps no better example exists of the past informing the present than the return of the California condor to the Vermilion Cliffs of Arizona Extinct in the region for nearly one hundred years condors were successfully reintroduced starting in the 1990s in an effort informed by the fossil record condor skeletal remains had been found in the area s late Pleistocene cave deposits The potential benefits of applying such data to conservation initiatives are unquestionably great yet integrating the relevant disciplines has proven challenging Conservation Paleobiology gathers a remarkable array of scientists from Jeremy B C Jackson to Geerat J Vermeij to provide an authoritative overview of how paleobiology can inform both the management of threatened species and larger conservation decisions Studying endangered species is difficult They are by definition rare some exist only in captivity and for those still in their

native habitats any experimentation can potentially have a negative effect on survival Moreover a lack of long term data makes it challenging to anticipate biotic responses to environmental conditions that are outside of our immediate experience But in the fossil and prefossil records from natural accumulations such as reefs shell beds and caves to human made deposits like kitchen middens and archaeological sites enlightening parallels to the Anthropocene can be found that might serve as a primer for present day predicaments Offering both deep time and near time perspectives and exploring a range of ecological and evolutionary dynamics and taxa from terrestrial as well as aquatic habitats Conservation Paleobiology is a sterling demonstration of how the past can be used to manage for the future giving new hope for the creation and implementation of successful conservation programs

**Bankers, Bureaucrats, and Central Bank Politics** Christopher Adolph, 2013-04-15 Most studies of the political economy of money focus on the laws protecting central banks from government interference this book turns to the overlooked people who actually make monetary policy decisions Using formal theory and statistical evidence from dozens of central banks across the developed and developing worlds this book shows that monetary policy agents are not all the same Molded by specific professional and sectoral backgrounds and driven by career concerns central bankers with different career trajectories choose predictably different monetary policies These differences undermine the widespread belief that central bank independence is a neutral solution for macroeconomic management Instead through careful selection and retention of central bankers partisan governments can and do influence monetary policy preserving a political trade off between inflation and real economic performance even in an age of legally independent central banks

**Trends in Teaching Experimentation in the Life Sciences** Nancy J. Pelaez, Stephanie M. Gardner, Trevor R. Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the flawed assumptions made at the classroom department and institutional level about what students are learning and what help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)
