Radical Business Model Transformation Carsten Linz, Günter Müller-Stewens, Alexander Zimmermann, 2017-01-03 Many companies are relying on a business model that is fundamentally suited to a different era. Now organizations are under pressure from new trends such as digitization and servitization. Trying to adapt to a new environment they risk relying on improvements that only scratch the surface of developing a radically different value proposition. Based on rigorous research into companies that have successfully and radically redesigned their business models, *Radical Business Model Transformation* shows why they made the leap, what they had to do to achieve it, and how it has transformed the potential for their organizations. This book is a step-by-step guide for leaders who want to seize the opportunity of new business models and gain a competitive advantage. It explains how to assess the status quo, identify the value of future business models, and develop a transformation path. It also provides advice on how to involve both the leadership team and all other employees in order to implement successful business model transformation. Illustrative case studies of organizations that have crossed the line to a more transformative business range from exponential growth companies like Netflix and global players like Xerox, SAP, and Daimler to mid-sized hidden champions like Knorr Bremse and LEGIC. *Radical Business Model Transformation* is essential reading for business leaders, transformation experts, and MBA students interested in ensuring that their business model is future-proof and can withstand the new proliferation of innovations that are set to transform the business landscape. Online supporting resources include a business model transformation calculator to help design your transformation path.

**Road Freight Logistics, Competition, and Innovation** Mark Dutz,2005 Abstract This empirical paper sheds light on a significant element of the debate of whether infrastructure services have a strong impact on economic development by exploring the impact of innovative road freight services on downstream business users The paper uses a new and purpose specific survey of 165 logistics service providers and 493 user enterprises in food processing food distribution and the automotive industry in the Czech Republic Hungary and Poland The main findings are that there are substantial downstream benefits from innovations in road freight services both dampening cost increases and raising sales revenues of business users The additional finding that increased intensity of competition in road freight services is significantly associated with the provision of innovative services suggests that easing any remaining barriers to competition in upstream business sectors should be a priority      *Oelhydraulik und Pneumatik* ,1969      International Directory of Company Histories Jay P.
