 your sex organs Different cultures today and in different epochs have given a variety of answers to this question It may seem
 self evident that every individual owns and has sovereignty over his or her own body parts such as the head legs nose
 stomach pancreas and other body parts The sex organs however seem to be an exception Even though they are as much an
 integral part of the individual as a leg or a liver the sex organs are unique in that many cultures have established laws and
 taboos over the use and even the mere display of the sex organs Thus certain cultures have placed constraints over the
 individual's ownership of his or her sex organs and actively regulate and restrict the individual's access and use of those
 organs In other cultures the question of ownership of the sex organs is more decisively answered In any culture where
 circumcision to any degree of either the male or female is practiced permitted encouraged or even merely tolerated it is clear
 that the individual is not considered to own his own sex organs In the United States today the medical establishment has
 created an is considered acceptable and desirable that anyone for environment where it any reason can authorize or execute
