**International Medical Graduates in the United States**

Hassaan Tohid, Howard Maibach, 2021-01-04 Thousands of international medical graduates come to the United States to start their career as physicians. Many of them, however, are not aware of the challenges and problems that they may encounter along the way. These difficulties can range from the language and cultural barriers to a lack of confidence and self-esteem. Many students are also unaware of the other career options besides getting into a clinical residency program. As a result of these issues, a great number of foreign medical students remain unmatched into the National Resident Matching Program. Not matching can be devastating for these graduates, both financially and medically. Students often suffer from psychological effects like major depression and generalized anxiety disorder. This book outlines the potential problems faced by these graduates and their possible solutions. Each chapter collects research evidence, interviews, and surveys to gather information to work on each possible problem, one by one, and describes a solution in great detail. Comprised of thirty chapters, each chapter is broken down into smaller sub-sections to investigate the main theme in depth. Issues addressed include the different types of international medical graduates and their lives in the United States, differences in the education system and healthcare system, the triangle of residency, language and cultural barriers, lack of professional contacts, confidence, self-image, and self-esteem issues, and restriction to specific fields and career paths. Written by experts in the field, *International Medical Graduates in the United States* is a first of its kind text that addresses the biggest issues faced by foreign medical graduates in today's world.

*Building Health Sciences Library Collections* Megan Inman, Marlena Rose, 2023-07-03 Selected as a 2025 Doody's Core Title. Collection development is a cornerstone of librarianship, and with the rapid pace that library materials are produced, a thorough knowledge of collection development is more important than ever before. However, with the myriad of choices available, creating a meaningful collection can be a daunting task. Building and maintaining a health sciences library collection can be a challenge, especially in scenarios where there is no dedicated collection services department or collection development librarian. Often in library school curriculum, collection development strategies are discussed, but specific examples of bibliographic sources may not be covered in detail, particularly for health sciences resources. Many collection development books often discuss the creation of policies, budgeting practices, and usability. This book is a comprehensive reference guide for those who will be creating and curating their library health sciences collections. Moving beyond a traditional list of titles, this guide will focus on several formats and areas. It features specific bibliographic information for top resources for a variety of subject areas and in a variety of formats. This book is designed for all librarians, whether new or experienced. Each chapter of this title does a deep dive into an area of health sciences library collection building, as well as covering how to maintain a current collection. This book is designed to provide readers with a resource to lean on in determining the best bets in providing their users with health sciences resources to support curriculum practice and other

user needs Readers who are interested in gleaning techniques for maintaining their health sciences library collection will also benefit from this how to guide as it details the deselection process Every health sciences librarian no matter their experience can benefit from this reference guide
