

APPLE MACS/MACBOOK'S

As I took Media at GCSE, I have increasingly grown more familiar with apple technology over time. As I am familiar with these already, I didn't really learn anything new during this course. I wasn't faced with any major problems during the period of the course, everything went to plan and ran smoothly, this meant that I was able to efficiently create my film poster, film magazine and film trailer with ease. The Macbook's were used to take home as they have the software required pre-installed on them, software such as Photoshop and Final cut express meant that I was able to work from home, giving me an opportunity to work on my products when I wasn't in school.

Race, Gender and Educational Desire Heidi Safia Mirza, 2008-11-19 This book is a great genealogy of black women s unrecognised contributions within both education and the wide social context I think it constitutes an important piece of work that is totally missing from the existing literature Diane Reay Professor of Education Cambridge University *Race Gender and Educational Desire* reveals the emotional and social consequences of gendered difference and racial division as experienced by black and ethnicised women teachers and students in schools and universities It explores the intersectionality of race and gender in education taking the topic in new challenging directions and asking How does race and gender structure the experiences of black and ethnicised women in our places of learning and teaching Why in the context of endemic race and gender inequality is there a persistent expression of educational desire among black and ethnicised women Why is black and ethnicised female empowerment important in understanding the dynamics of wider social change Social commentators academics policy makers and political activists have debated the causes of endemic gender and race inequalities in education for several decades This important and timely book demonstrates the alternative power of a black feminist framework in illuminating the interconnections between race and gender and processes of educational inequality

Heidi Safia Mirza a leading scholar in the field takes us on a personal and political journey through the debates on black British feminism genetics and the new racism citizenship and black female cultures of resistance Mirza addresses some of the most controversial issues that shape the black and ethnic female experience in school and higher education such as multiculturalism Islamophobia diversity race equality and equal opportunities Race Gender and Educational Desire makes a plea for hope and optimism arguing that black women s educational desire for themselves and their children embodies a feminised prospectus for a successful multicultural future This book will be of particular interest to students academics and researchers in the field of education sociology of education multicultural education and social policy Heidi Safia Mirza is Professor of Equalities Studies in Education at the Institute of Education University of London and Director of the Centre for Rights Equalities and Social Justice CRESJ She is also author of Young Female and Black Routledge

Which Way Social Justice in Mathematics Education? Leone Burton,2003-02-28 This contributed volume explores equity and social justice within the field of mathematics education In part one Helga Jungwirth s introductory chapter provides a strong theoretical overview that is based in actual classroom behaviors and a typology that classifies the various interpretations found within this volume Also in part one Laurie Hart discusses developments in equity research in the United States Part two focuses on results of studies about social justice and their impact on learning in mathematics classrooms in various parts of the world For example in a chapter on Peru social justice does not just encompass gender but also inequalities in opportunities to learn such as problems of resources living and social conditions communal demands and language needs And part three focuses on computers as a resource to mathematics teaching The contributors raise several important social justice issues which have previously remained unresearched Although there are a number of chapters specifically dealing with gender many of the authors use one of the following strategies their gender specific questions are set in a wider socio cultural context they challenge what have threatened to become false orthodoxies or they raise other important issues These other issues include the meaning of democratic citizenship for mathematics classrooms the links between parents and children learning mathematics and the preconceptions of some teachers of underprivileged students in Australia Other chapters explore different forms of classroom communication participation and assessment The pieces on computers state that there is still not enough research to conclude whether computers in the mathematics classrooms are supportive of or detrimental to the learning of all students The one thing on which every author in this volume does agree is that social justice in mathematics education has still not been attained but that we must strive toward it to improve educational practices and society in general

Boys, Masculinities and Reading Laura Scholes,2017-09-01 Boys Masculinities and Reading explores elementary students interpretations of their experiences of reading and the contextual influences that impact those experiences While research continues to highlight the apparent systematic underperformance of boys in comparison to girls on national and international reading benchmarks this text moves beyond broad generalizations to consider complexities inherent in notions

of masculinity and associated tensions Applying a socio cultural perspective Scholes highlights the voices of boys and girls by focusing on their reading experiences Examining the perceived generalized crisis of boys underperformance in reading and literacy Scholes identifies the factors that shape perceptions of masculinity among different groups of boys across the globe

Black British Intellectuals and Education Paul Warmington, 2014-02-24 Ask any moderately interested Briton to name a black intellectual and chances are the response will be an American name Malcolm X or Barack Obama Toni Morrison or Cornel West Yet Britain has its own robust black intellectual traditions and its own master teachers among them C L R James Claudia Jones Ambalavaner Sivanandan Stuart Hall and Paul Gilroy However while in the USA black public intellectuals are an embedded if often embattled feature of national life black British thinkers remain routinely marginalized Black British Intellectuals and Education counters this neglect by exploring histories of race education and social justice through the work of black British public intellectuals academics educators and campaigners The book provides a critical history of diverse currents in black British intellectual production from the eighteenth century through post war migration and into the post multicultural present focusing on the sometimes hidden impacts of black thinkers on education and social justice Firstly it argues that black British thinkers have helped fundamentally to shape educational policy practice and philosophy particularly in the post war period Secondly it suggests that education has been one of the key spaces in which the mass consciousness of being black and British has emerged and a key site in which black British intellectual positions have been defined and differentiated Chapters explore the early development of black British intellectual life from the slave narratives to the anti colonial movements of the early twentieth century how African Caribbean and Asian communities began to organize against racial inequalities in schooling in the post Windrush era of the 1950s and 60s how from out of these grassroots struggles black intellectuals and activists of the 1970s 80s and 90s developed radical critiques of education youth and structural racism the influence of multiculturalism black cultural studies and black feminism on education current developments in black British educational work including post racial approaches Critical Race Theory and black social conservatism Black British Intellectuals and Education will be of key relevance to undergraduates postgraduates and academics engaged in research on race ethnicity education social justice and cultural studies

Masculinities In Mathematics Mendick, Heather, 2006-06-01 We desperately need more people with good mathematical qualifications to fill many posts in numerate occupations yet the numbers choosing to continue studying mathematics have fallen over the last 10 years This book is important as it investigates how mathematics is aligned with masculinity and hence is not attractive to a significant part of the population It is also challenging scholarly and a thoroughly good read It reports the results of carefully designed research on gender and choice and includes some fascinating individual case studies It should make us all reflect on what we are doing and how we can repair the damage Margaret Brown Professor of Mathematical Education King s College London The book speaks to me as one of those texts that will become seminal in mathematics education It is original refreshing and despite a complicated plot points to some ways forward It is engagingly written if at times perhaps a little bit no nonsense in tone It

will be of interest to teachers and teacher educators as well as providing a theoretical stance that should inform future research British Educational Research Journal The study of mathematics together with other gendered subjects such as science and engineering usually attracts more male than female pupils particularly at more advanced levels In this book Heather Mendick explores this phenomenon addressing the important question of why more boys than girls choose to study mathematics She combines new research with an original theoretical approach to argue that doing mathematics is doing masculinity The book illuminates what studying mathematics means for both students and teachers and offers a broad range of insights into students views and practices In addition to the words of young people learning mathematics the masculinity of mathematics is explored through historical material and cinematic representations Heather Mendick discusses the ways in which the alignment of mathematics with masculinity creates tensions for girls and women doing the subject These tensions are sensitively explored through interviews with young men and women to show how doing mathematics fits or conflicts with their gender identities Finally the book explores the implications for teachers including ways to promote gender equity in mathematics education This is key reading for students on courses in gender and education mathematics education gender and curriculum and social justice

Research Methods in Social Studies Education Keith C. Barton, 2006-03-01 This volume fills a significant gap in the scholarship on social studies education by providing thoughtful reflections on research methods in the field It is not a how to guide but an exploration of key issues related to the design and implementation of empirical studies The authors are active researchers who use varied methods in diverse settings including historical research international comparative studies survey research interviews with students and teachers classroom observations self studies and action research and emancipatory methodologies They use their own experiences to examine such topics as the conceptualization of research questions relationships with participants researchers identities and elicitation of students and teachers thinking This collection should become indispensable for both beginning and experienced scholars in social studies
