Chris Baker,2022-07-30 In the hundreds of books written about battleships the authors tend to draw down the curtain on the

careers of these great vessels in September 1945 with the surrender of Japan Yet on that day some ninety eight battleships or ex battleships might be spotted around the world and eleven of them were in or around Tokyo Bay for the surrender itself What happened to all those ships This new book takes a fresh look at the slow demise of the battleship It examines the decisions made by the major world powers after 1945 and their aspirations to retain battleships in their navies despite financial stringency It places the history and role of battleships after 1945 in their geo political context centered around the Cold War and the need for the West to face down an aggressive Soviet Union It also examines the impact on battleships of operational analysis of the Second World War and new technological developments notably the atom bomb and the guided missile The book uses the wealth of information from ship s books ship s logs and gun logs to document in considerable detail what the ships actually did after the Second World War with a particular focus on those of the Royal Navy It covers United States battleship operations in Korea Vietnam and the Gulf War as well as the deterrent role played by battleships for NATO from the 1950s to the 1990s Finally it brings the story up to date by documenting the preservation as museum ships of the eight dreadnoughts which still exist today in the United States Extensively illustrated with photographs of the huge range of activities of battleships after 1945 from their use as Fleet flagships to Royal or Presidential yachts and more poignantly as target ships this new book will appeal equally to the historic ship enthusiast and naval specialist and provide a novel perspective through a battleship shaped lens on late twentieth century history for the more general reader
