General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the
lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an
appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically
analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical
conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks
textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with
the scientific method are encountered Further experimentation provides additional cause effect observations leading to an
even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a
solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post
lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook
and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's
Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling
data is supported by the Data Analysis section **General Chemistry: Lab Manual** Petra Van Koppen, 2006-12-01
