Gupta, Mamta, 2021-03-15 With the advent of the IT revolution the volume of data produced has increased exponentially and is still showing an upward trend This data may be abundant and enormous but it is a precious resource and should be managed properly Cloud technology plays an important role in data management Storing data in the cloud rather than on local storage has many benefits but apart from these benefits there are privacy concerns in storing sensitive data over third party servers These concerns can be addressed by storing data in an encrypted form however while encryption solves the problem of privacy it engenders other serious issues including the infeasibility of the fundamental search operation and a reduction in flexibility when sharing data with other users amongst others The concept of searchable encryption addresses these issues This book provides every necessary detail required to develop a secure searchable encryption scheme using both symmetric and asymmetric cryptographic primitives along with the appropriate security models to ensure the minimum security requirements for real world applications **Wireless Algorithms, Systems, and Applications** Lei Wang, Michael Segal, Jenhui Chen, Tie Qiu, 2022-11-17 The three volume set constitutes the proceedings of the 17th International Conference on Wireless Algorithms Systems and Applications WASA 2022 which was held during November 24th 26th 2022 The conference took place in Dalian China The 95 full and 62 short papers presented in these proceedings were carefully reviewed and selected from 265 submissions The contributions in cyber physical systems including intelligent transportation systems and smart healthcare systems security and privacy topology control and coverage energy efficient algorithms systems and protocol design **Advances in Cryptology -- CRYPTO 2011** Phillip Rogaway, 2011-07-22 This book constitutes the refereed proceedings of the 31st Annual International Cryptology Conference CRYPTO 2011 held in Santa Barbara CA USA in August 2011 The 42 revised full papers presented were carefully reviewed and selected from 230 submissions The volume also contains the abstract of one invited talk The papers are organized in topical sections on
