**Facing the Consequences** W.H. Schmidt, Curtis C. McKnight, Leland S. Cogan, Pamela M. Jakwerth, Richard T. Houang, 2007-05-08 Facing the Consequences presents a perspective on US mathematics and science education that is developed from data gathered as part of the Third International Mathematics and Science Study TIMSS TIMSS is the most extensive and far reaching cross national comparative study of mathematics and science education ever attempted It includes comparing official curricula textbooks teacher practices and student achievements for many countries from 20 to 50 countries depending on the particular comparison Thousands of official documents and textbooks were analyzed Thousands of teachers principals and other experts responded to survey questionnaires A sample of mathematics teachers in three countries had their lessons videotaped Hundreds of thousands of children in almost 50 countries were tested in mathematics and science This report presents a closer look at US mathematics and science education through careful examination of TIMSS data The authors believe this investigation shows how deceptive many often unquestioned assumptions about American education can be Drawing upon many new analyses not previously reported and integrating these with previous analyses of TIMSS data the authors develop and illustrate the argument that what happens to American students is the consequence of American beliefs that shape educational practice and the accretion of a myriad educational choices made in mathematics and science education

**Success and Failure in Israeli Elementary Education**

Abram Minkowich, Dan Deyá<sup>1</sup>is, Joseph Bashi, This book presents a comprehensive evaluation study of elementary education in Israel conducted over several years and completed in 1977 The study concentrates on Jewish schools but some data are presented from parallel studies in the Arab Schools A notable feature of the study is its unusually large scope both in size and content It sampled nearly ten percent of Jewish schools and fifteen percent of Arab schools The content includes a great variety of areas cultural origins home conditions and socialization patterns of pupils conditions and practices in schools teachers and principals backgrounds and their attitudes toward central issues in education pupils personality characteristics and motivations related to school experience their learning abilities and achievements in five major school subjects Special emphasis is given to the disadvantaged pupils and an examination of the problem of equality of educational opportunity This study's uniqueness lies in a novel approach in the measurement and analysis of scholastic achievements Like all studies in the psychometric tradition it places pupils in a position related to an advantaged pupil group But test construction and most data analyses were carried out by the criterion reference approach combined with a notion of master learning This enabled presentation of the absolute achievement level of a pupil or a pupil group vis a vis the optimal and minimal requirements of

the curriculum and each school subject as well as for its various content area This approach permits much more than the traditional methods utilization of results for deliberation and revision in educational policies This applies particularly to curriculum construction and methods of instruction It may also lead to a more appropriate definition of the disadvantaged pupil Five chapters of the study present a historical review and sociological analysis of the problems of Israeli education and deal with specific methodological considerations The twelve following chapters present detailed results and analysis for each topic of investigation Common Core Math For Parents For Dummies with Videos Online Christopher
