The Austro-Libertarian Point of View Alan G. Futerman, Walter E. Block, 2021-11-01 This book covers several areas of

economic theory and political philosophy from the perspective of Austrian Economics and libertarianism As such it deals with Epistemology and Methodology Microeconomics Macroeconomics Labor Economics International Economics Political Philosophy Law and Public Policy all from the Austro libertarian perspective Hence this book offers an integrated view of libertarianism and Austrian economics in the light of recent debates in the areas of economic science and political philosophy Moreover it builds from the foundations of the Austrian approach epistemology and methodology while the latter material deals with its application to the individual from the microeconomic perspective which in turn allows an exploration of subjects in macroeconomics Additionally this work applies Austro libertarianism to law politics and public policy Thus it offers a unified view of the entire approach in a logical progression allowing the readers to judge this perspective in full Futerman and Block say that their book is not a manual which I suppose it is not But it is a collection of highly pertinent essays from which you can understand what is mistaken in the orthodoxy of economics law and politics The central term of art in Austrian economics is that phrase human action It is the exercise of human will not the blind bumping of one molecule against another or one organism against another as in the physical sciences Futerman and Block distinguish Austrian economics as a scientific enterprise based on liberty of the will from libertarianism as an advocacy based on policies implied by such liberty Although Austrian economics is positive and libertarianism is normative they write this book shows how both are related how each can support the other Indeed they do Deirdre N McCloskey PhD UIC Distinguished Professor of Economics and of History Emerita Professor of English Emerita Professor of Communication Emerita University of Illinois at Chicago

Beyond Barter: Lectures In Monetary Economics After 'Rethinking' John Smithin, 2022-04-21 The

conventional macroeconomic theory of the late twentieth and early twenty first century based on the assumption that the working of complex monetary economy could be analysed on the same principles as those of barter exchange has demonstrably failed This book provides a thorough rethinking of the nature of a monetary economy It builds upon a complete theory of the domestic and international monetary macro economy and of macroeconomic policy for the modern age Central to the analysis is the idea that a successful market economy requires an endogenous supply of money via the banking system Therefore to achieve macroeconomic stability the book proposes the targeting of real interest rates under a regime of flexible exchange rates or fixed but adjustable exchange rates as the main goal of monetary policy along with a range of innovative fiscal and trade policies to promote economic growth and thereby achieve full employment and a fair distribution of income

Methods of Resolving Conflicts Between Treaties Ali Sadat-Akhavi, 2003-01-01 Despite the theoretical and practical importance of the question of conflict between treaties little has been written on the subject This monograph fills this gap by providing a detailed analysis of the main issues The book is divided into three parts The first deals with the definition of conflict causes of conflict and different types of conflict The second part examines different sources of international law in order to identify rules of international law relating to the resolution of conflicts The third part addresses the actual process of

resolving conflicts between treaties After describing different stages of treaty conflict resolution it discusses some special principles advanced for resolving conflicts between certain types of treaties namely those relating to the protection of human rights those concerning dispute settlement and treaties dealing with private law issues This work will assist and appeal to both academics in the fields of international law and political science and professionals engaged in international negotiations and treaty making
