and courses but there's very little out there about how you actually innovate. Innovation and entrepreneurship are not one and the same although aspiring innovators often think of them that way. They are told to get an idea and a team and to build a show and tell for potential investors. In *Innovating*, Luis Perez Brea describes another approach, a doer's approach developed over a decade at MIT and internationally in workshops, classes, and companies. He shows that innovating doesn't require an earth-shattering idea; all it takes is a hunch. Anyone can do it. By prototyping a problem and learning by being wrong, innovating can be scaled up to make an impact. As Perez Brea demonstrates, nothing is new at the outset of what we only later celebrate as innovation. In *Innovating*, the process illustrated by unique and dynamic artwork is shown to be empirical, experimental, nonlinear, and incremental. You give your hunch the structure of a problem. Anything can be a part. Your innovating accrues other people's knowledge and skills. Perez Brea describes how to create a kit for innovating and outlines questions that will help you think in new ways. Finally, he shows how to systematize what you've learned to advocate, communicate, scale up, manage innovating continuously, and document. You need a notebook to converse with yourself, he advises. Everyone interested in innovating also needs to read this book.

[Affinity Online](#) Mizuko Ito, Crystle Martin, Rachel Cody Pfister, Matthew H. Rafalow, Katie Salen, Amanda Wortman, 2018-12-18. How online affinity networks expand learning and opportunity for young people. Boyband, One Direction, fanfiction writers, gamers who solve math problems together, Harry Potter fans who knit for a cause. Across subcultures and geographies, young fans have found each other and formed community, online learning from one another along the way. From these and other in-depth case studies of online affinity networks, *Affinity Online* considers how young people have found new opportunities for expanded learning in the digital age. These cases reveal the shared characteristics and unique cultures and practices of different online affinity networks and how they support connected learning: learning that brings together youth interests, social activity, and accomplishment in civic, academic, and career-relevant arenas. Although involvement in online communities is an established fixture of growing up in the networked age, participation in these spaces shows how young people are actively taking up new media for their own engaged learning and social development. While providing a wealth of positive examples for how the online world provides new opportunities for learning, the book also examines the ways in which these communities still reproduce inequalities based on gender, race, and socioeconomic status. The book concludes with a set of concrete suggestions for how the positive learning opportunities offered by online communities could be made available to more young people at school and at home. *Affinity Online* explores how online practices and networks bridge the divide between in-school and out-of-school learning, finding that online affinity networks are creating new spaces of opportunity for realizing the ideals of connected learning.

**Unbored** Joshua Glenn, Elizabeth Foy Larsen, 2013-07-18. *Unbored* is the book every modern child needs. Brilliantly walking the line between cool and constructive, it's crammed with activities that are not only fun and doable but that also get kids standing on their own two feet.
