Gender Blender:

Gendermaps John Money, 2016-10-06 To understand masculine and feminine social and political history in the second half of the 20th century one must first understand the lexical history of the term gender which did not become an attribute of human beings until 1955 when John Money introduced the concept of gender role to refer to the masculine or feminine presentation of individuals whose genital organs by reason of birth defect were anatomically neither completely male or completely female but hermaphroditic In this book Money explores the history of gender differentiation and its impact on contemporary postmodern social constructionist explanations of male and female He argues that the nature vs nurture dichotomy should be abandoned in favour of a paradigm of nature critical period nurture The book further discusses how some gender differences are phylogenetically shared by all people and others are ontologically unique to an individual

Unbound Arlene Stein, 2018-06-05 An intimate portrait of a new generation of transmasculine individuals as they undergo gender transitions. Award-winning sociologist Arlene Stein takes us into the lives of four strangers who find themselves together in a sun-drenched surgeon's office having traveled to Florida from across the United States in order to masculinize their chests. Ben, Lucas, Parker, and Nadia wish to feel more comfortable in their bodies; three of them are also taking testosterone so that others recognize them as male. Following them over the course of a year, Stein shows how members of this young transgender generation along with other gender dissidents are refashioning their identities and challenging others' conceptions of who they are. During a time of conservative resurgence, they do so despite great personal costs. Transgender men comprise a large, growing proportion of the trans population, yet they remain largely invisible. In this powerful, timely, and eye-opening account, Stein draws from dozens of interviews with transgender people and their friends and families, as well as with activists and medical and psychological experts. *Unbound* documents the varied ways younger trans men see themselves and how they are changing our understanding of what it means to be male and female in America.

Current Concepts in Transgender Identity Dallas Denny, 2013-05-13 First published in 1998, this meaningful study looks at the transsexual experience from the point of view of those that are living experts: those that live transsexualism or cross-dressing and have been directly affected.

Culture, Health and Sexuality Peter Aggleton, Richard Parker, Felicity Thomas, 2015-04-24 The last twenty years have seen a growth in multi-disciplinary work in the area of sexuality, culture, and health. What was once a set of specialist concerns has been steadily mainstreamed. Alongside this, a broader interest has developed in social and cultural factors relating to sexuality and sexual health, from family planning and STI management to gender and intimate partner violence and the technologisation of sex. This book offers a research-based overview of key topics relevant to social and cultural perspectives on sexuality and sexual health. Beginning with an extended introduction and divided into six sections, it looks at culture, sex, and gender, sexual diversity, sex work, migration, and sexual violence. Each section opens with an editorial discussion which places the theme, and the chapters that follow, in a contemporary context. Six additional substantive chapters can be accessed online at www.routledge.com/cw/aggleton. Including cutting-edge conceptual and empirical material from around the world, this is a key resource for students in and across a variety of academic disciplines in the social and health sciences. It is especially suitable for readers from sexuality studies, gender studies, development studies, anthropology, and sociology, as well as those with public health and social work backgrounds.

Race, Ethnicity, and Consumption Patricia Banks, 2020-07-08 *Race, Ethnicity and Consumption: A Sociological View* looks at the central concerns of consumer culture through the lens of race and ethnicity.

Each chapter illustrates the connections between race ethnicity and consumption by focusing on a specific theme identity crossing cultures marketing and advertising neighborhoods discrimination and social activism By exploring issues such as multicultural marketing cultural appropriation consumer racial profiling urban food deserts and racialized political consumerism students scholars and other curious readers will gain insight on the ways that racial and ethnic boundaries shape and are shaped by consumption This book goes beyond the typical treatments of race and ethnicity in introductory texts on consumption by not only providing a comprehensive overview of the major theories and concepts that sociologists use to make sense of consumption race and ethnicity but also by examining these themes within distinctly contemporary contexts such as digital platforms and activism Documenting the complexities and contradictions within consumer culture **Race Ethnicity and Consumption** is an excellent text for sociology courses on consumers and consumption race and ethnicity the economy and inequality It will also be an informative resource for courses on consumer culture in the broader social sciences marketing and the humanities
