 a new international economic order The World Bank emerged as one of the most powerful financial institutions in the world
 and a new colonial authority in all but name But how does it operate who funds it and what agenda does it work to promote

 and Temporary Labour Migration** Rasika Jayasuriya, 2021-06-22 This book focuses on the neglected yet critical issue of
 how the global migration of millions of parents as low waged migrant workers impacts the rights of their children under
 international human rights law The work provides a systematic analysis and critique of how the restrictive features of
 policies governing temporary labour migration interfere with provisions of the Convention on the Rights of the Child that
 protect the child parent relationship and parental role in children s lives Combining social and legal research it identifies
 both potential harms to children s well being caused by prolonged child parent separation and State duties to protect this
 relationship which is deliberately disrupted by temporary labour migration policies The book boldly argues that States
 benefitting from the labour of migrant workers share responsibility under international human rights law to mitigate harms
 to the children of these workers including by supporting effective measures to maintain transnational child parent
 relationships It identifies measures to incorporate children s best interests into temporary labour migration policies offering
 ways to reduce interferences with children s family rights This book fills a gap that emerges at the intersection of child rights
 studies migration research and existing literature on the purported nexus between labour migration and international
 development It will be a valuable resource for academics researchers and policymakers working in these areas The Open

 Raju, Kuntala Lahiri-Dutt, 2012-12-06 Until the 1970s gender had been invisible in analyses of social space and place in the

androcentric discipline of geography While recent contributions to feminist geography have challenged this in India the engagement of geographers with gender by being conservative in its choice of focus and orthodox in methodology has been unable to destabilise the established disciplinary order However with younger scholars becoming increasingly interested in studying gender in geography novel and innovative methods that include combinations of quantitative and qualitative analyses visual sources and in depth case studies are being tried out and accepted in geography despite its masculine legacy This pioneering study brings together Indian geographers contributions to understanding gender and through them seeks to enrich the discipline of geography It engages with the recent spatial turn in the social sciences which has reclaimed the explanatory power of space and place in social theory that had been nearly lost to deconstructive postmodernist scholarship The volume draws entirely from the Indian scholarship showcasing contextualised knowledge production but hopes to initiate a dialogue with scholars elsewhere working with feminist methodologies

Women, Gender, Remittances and Development in the Global South Ton van Naerssen,Lothar Smith,Marianne H. Marchand,2016-03-09 This book endeavours to take the conceptualisation of the relationship between transnational remittance exchanges and gender to a new level Thus inevitably it provides a number of case studies of relationships between gender and remittances from around the world highlighting different processes and practises Thereby the authors seek to understand the impact of remittances on gender and gender relations both at the sending as well as at the receiving end For each case study authors ask how remittances affect gender identities and relationships but also vice versa By itself this already adds a wealth of insights to a field that is remarkably understudied despite a volume of studies on gender and the feminization of migration in developing contexts Chapters take an open explorative approach to the relationship between gender and remittance behaviour with the aid of case studies focusing on transnational flows between migrants and countries of origin With the wide variety of cases this book is able to provide conceptual insights to better understand how remittances affect gender identity roles and relations at both the receiving and sending end and give specific attention to the roles of various actors directly and indirectly involved in remittance sending in current collectively organized remittance schemes from around the world

Migration and Poverty Edmundo Murrugarra,Jennica Larrison,Marcin Sasin,2010-11-24 This volume uses recent research from the World Bank to document and analyze the bidirectional relationship between poverty and migration in

developing countries The case studies chapters compiled in this book from Tanzania Nepal Albania and Nicaragua as well as the last policy oriented chapter illustrate the diversity of migration experience and tackle the complicated nexus between migration and poverty reduction Two main messages emerge Although evidence indicates that migration reduces poverty it also shows that migration opportunities of the poor differ from that of the rest In general the evidence suggests that the poor either migrate less or migrate to low return destinations As a consequence many developing countries are not maximizing the poverty reducing potential of migration The main reason behind this outcome is difficulties in access to remunerative migration opportunities and the high costs associated with migrating It is shown for example that reducing migration costs makes migration more pro poor The volume shows that developing countries governments are not without means to improve this situation Several of the country examples offer a few policy recommendations towards this end
