## General Biology Textbook:

**GENERAL BIOLOGY I** Dennis Holley, 2017-05-31 *GENERAL BIOLOGY Investigating Life* is an introductory level college biology textbook that provides students with an accessible and engaging look at the fundamentals of biology. Written for a two-term undergraduate course of mixed majors and non-majors, this reader-friendly text is concept-driven vs. terminology-driven. That is, the text is based on the underlying concepts and principles of biology rather than strict memorization of terminology. Written in a student-centered conversational style, this educational research-based textbook uniquely connects students and our society to living things from various perspectives: economic, ecologic, medical, and cultural, exploring how the biological world and human realm are intimately intertwined. End-of-chapter questions challenge students to think critically and creatively while incorporating science process skills and biological principles. *GENERAL BIOLOGY I* Dennis Holley, 2017-05-31 *GENERAL BIOLOGY Investigating Life* is an introductory level college biology textbook that provides students with an accessible and engaging look at the fundamentals of biology. Muller, 2017-10-06 The scientific achievements and forgotten legacy of a major Austrian research institute from its founding in 1902 to its wartime destruction in 1945. The Biologische Versuchsanstalt was founded in Vienna in 1902 with the explicit goal to foster the quantification, mathematization, and theory formation of the biological sciences. Three biologists from affluent Viennese Jewish families: Hans Przibram, Wilhelm Figdor,

and Leopold von Portheim founded financed and nurtured the institute overseeing its development into one of the most advanced biological research institutes of the time And yet today its accomplishments are nearly forgotten In 1938 the founders and other members were denied access to the institute by the Nazis and were forced into exile or deported to concentration camps The building itself was destroyed by fire in April 1945 This book rescues the legacy of the Vivarium as the Institute was often called describing both its scientific achievements and its place in history The book covers the Viennese sociocultural context at the time of the Vivarium s founding and the scientific zeitgeist that shaped its investigations It discusses the institute s departments and their research topics and describes two examples that had scientific and international ramifications the early work of Karl von Frisch who in 1973 won the Nobel Prize in Physiology or Medicine and the connection to Cold Spring Harbor Laboratory in New York Contributors Heiner Fangerau Johannes Feichtinger Georg Gaugusch Manfred D Laubichler Cheryl A Logan Gerd B M ller Tania Munz K rin Nickelsen Christian Rei Kate E Sohasky Heiko Stoff Klaus Taschwer
