Contemporary Approaches to Commemorative Public Art Brenda Schmahmann, 2025-06-12 In this collection a diverse range of international contributors examine commemorative monuments from the late twentieth and twenty first centuries The book reveals how those monuments enable new perspectives and understanding of histories as well as a heightened involvement of viewers through not simply their subject matter but also most crucially their actual form and design While some contributors explore new approaches to the art of commemoration that artists and designers have deployed in recent monuments others examine how artists have undertaken creative engagements with historical statuary and sites using these interventions to offer critique and commentary Additionally the contributions consider the impact of political change on ways in which an inherited commemorative landscape is interpreted and negotiated Questions considered by the contributions include How might new monuments be shaped and how might they function differently from those of the past Is there a place for portraiture in the contemporary commemorative landscape Should commemorative monuments be envisaged as permanent fixtures or are temporary approaches more viable How effectively have artists disrupted the meanings of historical monuments and sites through installation performance video and other media How has political change played out at historical sites affecting how commemorative monuments from prior dispensations are understood in the 2020s This collection will be of value to researchers in Art History Visual Studies and Heritage Studies as well as scholars in all disciplines and fields who are interested in public art public memory and the politics of commemoration Drawing Curie Scott, 2021-10-25 Drawings are everywhere Daubed on ancient cave walls and projected on screens Drawings helps us

describe science depict emotions and discover Yet many of us laid aside drawing or more simply mark making in childhood thereby losing a rich and varied way to tell our stories

The Value of Drawing Instruction in the Visual Arts and Across Curricula Seymour Simmons III, 2021-03-29 By applying philosophical and historical perspectives to drawing instruction this volume demonstrates how diverse teaching methods contribute to cognitive and holistic development applicable within and beyond the visual arts Offering a new perspective on the art and science of drawing this text reveals the often unrecognized benefits that drawing can have on the human mind and thus argues for the importance of drawing instruction despite and even due to contemporary digitalization Given the predominance of visual information and digital media visual thinking in and through drawing may be an essential skill for the future As such the book counters recent declines in drawing instruction to propose five Paradigms for teaching drawing as design as seeing as experience and experiment as expression and as a visual language with exemplary curricula for pre K12 art and general education pre professional programs across the visual arts and continuing education With the aid of instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all This text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education Aligning with contemporary trends such as Design Thinking STEAM and Graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration

The SAGE Handbook of Visual Research Methods Luc Pauwels, Dawn Mannay, 2019-12-10 The second thoroughly revised and expanded edition of The SAGE Handbook of Visual Research Methods presents a wide ranging exploration and overview of the field today As in its first edition the Handbook does not aim to present a consistent view or voice but rather to exemplify diversity and contradictions in perspectives and techniques The selection of chapters from the first edition have been fully updated to reflect current developments New chapters to the second edition cover key topics including picture sorting techniques creative methods using artefacts visual framing analysis therapeutic uses of images and various emerging digital technologies and online practices At the core of all contributions are theoretical and methodological debates about the meanings and study of the visual presented in vibrant accounts of research design analytical techniques fieldwork encounters and data presentation This handbook presents a unique survey of the discipline that will be essential reading for scholars and students across the social and behavioural sciences arts and humanities and far beyond these disciplinary boundaries The Handbook is organized into seven main sections PART 1 FRAMING THE FIELD OF VISUAL RESEARCH PART 2 VISUAL AND SPATIAL DATA PRODUCTION METHODS AND TECHNOLOGIES PART 3 PARTICIPATORY AND SUBJECT CENTERED APPROACHES PART 4 ANALYTICAL FRAMEWORKS AND PERSPECTIVES PART 5 MULTIMODAL AND MULTISENSORIAL RESEARCH PART 6 RESEARCHING ONLINE PRACTICES PART 7 COMMUNICATING THE VISUAL FORMATS AND

CONCERNS **Drawing Difference** Marsha Meskimmon, Phil Sawdon, 2016-03-24 Drawing has been growing in recognition and stature within contemporary fine art since the mid 1970s Simultaneously feminist activism has been widespread leading to the increased prominence of women artists scholars critics and curators and the wide acknowledgement of the crucial role played by gender and sexual difference in constituting the subject Drawing Difference argues that these developments did not occur in parallel simply by coincidence Rather the intimate interplay between drawing and feminism is best characterised as allotropic a term originating in chemistry that describes a single pure element which nevertheless assumes varied physical structures denoting the fundamental affinities which underlie apparently differing material forms The book takes as its starting point three works from the 1970s by Annette Messager Dorothea Rockburne and Carolee Schneeman that are used to exemplify critical developments in feminist art history and key moments for drawing as a means of expression Throughout the chapters these works are further explored in relation to the contemporary drawing practices of Marco Maggi Sian Bowen Susan Hauptmann Cornelia Parker Christoph Fink and Toba Khedori Their works are shown to be re iterative sites where mark making differs with each appearance yet retains certain essential features Dividing its analysis into the themes Approaching Tropes and Coinciding the book analyses how both drawing and feminist discourse emphasise dialogue matter and openness It demonstrates how sexual difference subjectivity and drawing are connected at an elemental level and thus how drawing has played a vital role in the articulation of the material and conceptual dynamics of feminism **Edward Ruscha** Lisa Turvey, 2014-01-01 An immense contribution to scholarship on Ed Ruscha and his pioneering artistic practice offering thorough documentation of his works on paper This highly anticipated book the first in a series of three comprehensively chronicles the first two decades of Ed Ruscha's work on paper which comprises the largest component of his production of original works Over 1 000 works on paper are documented all created between 1956 and 1976 and they encompass a wide range of formats materials themes and styles Included are collages ephemeral sketches preparatory studies for paintings oil on paper works and drawings executed in a variety of inventive materials including gunpowder and organic substances Ruscha came to prominence in the early 1960s as part of the Pop art movement although his work equally engages the legacies of Dada Surrealism and Abstract Expressionism as well as the Conceptual art that emerged later in the decade He has long enjoyed international standing and admiration and his work is widely known Despite this recognition this volume contains hundreds of works that have infrequently or never been exhibited or published Each work is catalogued with a color reproduction collection details full chronological provenance exhibition history and bibliographic references Essays by Lisa Turvey and Harry Cooper complete this extraordinary survey which expands and enriches our understanding of Ruscha's pioneering exploration of the written word as a subject for visual art and his witty assessment of the iconography of Los Angeles both real and imagined CONTEMPORARY APPROACH - DRAWING. CLAUDIA W. BETTI, TEEL SALE, 1980 **Drawing Imagining Building** Paul

Emmons,2019-04-01 Drawing Imagining Building focuses on the history of hand drawing practices to capture some of the most crucial and overlooked parts of the process Using 80 black and white images to illustrate the examples it examines architectural drawing practices to elucidate the ways drawing advances the architect s imagination Emmons considers drawing practices in the Renaissance and up to the first half of the twentieth century Combining systematic analysis across time with historical explication presents the development of hand drawing while also grounding early modern practices in their historical milieu Each of the illustrated chapters considers formative aspects of architectural drawing practice such as upright elevations flowing lines and occult lines and drawing scales to identify their roots in an embodied approach to show how hand drawing contributes to the architect s productive imagination By documenting some of the ways of thinking through practices of architectural handdrawing it describes how practices can enrich the ethical imagination of the architect This book would be beneficial for academics practitioners and students of architecture particularly those who are interested in the history and significance of hand drawing and technical drawing

Drawing Investigations Sarah Casey,Gerry

Davies,2020-06-11 Using close visual analysis of drawings artist interviews critical analysis and exegesis Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed How does drawing add shape to ideas How does the artist accommodate to challenges and restraints of a particular environment To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world urban environment social forces and lived experience Examples represent a spectrum of research in international contexts an oceanographic Institute in California the archives of Amsterdam s Rijksmuseum the Antarctic Survey geothermal research in Japan and the Kurdish diaspora in Iraq Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents By exploring drawing s capacity to capture and describe experience to sharpen visual faculties and to bridge embodied and conceptual knowledge Drawing Investigations offers a fresh critical perspective on contemporary drawing practice

Body, Space, and Place in

Collective and Collaborative Drawing Helen Gørrill,Jill Journeaux,Sara Reed,2020-01-15 Building on the success of the first volume in this series of research on collective and collaborative drawing this book s key themes are linked through the concepts of body space and place The location of the body in art has always been central but the exploration of it here in relation to place and space uncovers a wide range of exciting and different contexts relationships and materials Space is examined through the practice and theorisation of drawing through the ongoing artistic practices of the authors and the writings of Berger and Derrida in relation to making viewing and understanding the drawing process Place is examined

through unique approaches to considering drawing through multiple consecutive and site specific places through place as a changing and temporal site and through the idea of the non place The contributors in this volume include academics artists dancers researchers designers and architects from across the globe Teaching the Arts David Roy,William Baker,Amy Hamilton,2019-07-02 Foregrounds the importance of arts education to children s development and learning Art Scents Larry Shiner,2020-02-11 Although the arts of incense and perfume making are among the oldest of human cultural practices it is only in the last two decades that the use of odors in the creation of art has begun to attract attention under the rubrics of olfactory art or scent art Contemporary olfactory art ranges from gallery and museum installations and the use of scents in music film and drama to the ambient scenting of stores and the use of scents in cuisine All these practices raise aesthetic and ethical issues but there is a long standing philosophical tradition most notably articulated in the work of Kant and Hegel which argues that the sense of smell lacks the cognitive capacity to be a vehicle for either serious art or reflective aesthetic experience This neglect and denigration of the aesthetic potential of smell was further reinforced by Darwin s and Freud s views of the human sense of smell as a near useless evolutionary vestige Smell has thus been widely neglected within the philosophy of art Larry Shiner s wide ranging book counters this tendency aiming to reinvigorate an interest in smell as an aesthetic experience He begins by countering the classic arguments against the aesthetic potential of smell with both philosophical arguments and evidence from neuroscience psychology anthropology history linguistics and literature He then draws on this empirical evidence to explore the range of aesthetic issues that arise in each of the major areas of the olfactory arts whether those issues arise from the use of scents with theater and music sculpture and installation architecture and urban design or avant garde cuisine Shiner gives special attention to the art status of perfumes and to the ethical issues that arise from scenting the body the ambient scenting of buildings and the use of scents in fast food Shiner s book provides both philosophers and other academic readers with not only a comprehensive overview of the aesthetic issues raised by the emergence of the olfactory arts but also shows the way forward for further studies of the aesthetics of smell **Ibsen and the Greeks** Norman Rhodes,1995 Was Ibsen influenced by Greek culture Were allusions to the Greeks configured in the Norwegian playwright s works According to author Norman Rhodes whether consciously or unconsciously many of Ibsen s plays are encoded with veiled references to ancient Greek culture Rhodes also postulates that Ibsen s perception of the importance of the Greeks was most likely mediated to him through German Romanticism and Scandinavian culture According to Rhodes numerous echoes of Greek literature resonate in such early Ibsen plays as Catiline The Warrior s Barrow Olaf Liljerkrans and Love s Comedy Ibsen s Brand and Peer Gynt are a dialectic pair which in key ways are suggestive of Homer s Iliad and Odyssey A Doll House has important parallels with Sophocles Antigone and An Enemy of the People correlates with both Plato s Apology and Sophocles Oedipus Tyrannos Moreover a Euripidean sense of fatal irrationality seems inscribed in Ibsen s final plays the protagonists John Rosmer Hedda Gabler Master Builder Solness John Gabriel Borkman and the

Fractured Scenes Damien Charrieras, François Mouillot, 2021-03-29 *Fractured Scenes* is the first extensive academic account of music and sound art practices that fall outside of the scope of mainstream music in Hong Kong It combines academic essays with original interviews conducted with prominent Hong Kong underground independent musicians and sound artists as well as first hand accounts by key local scene actors in order to survey genres such as experimental noise music deconstructed electronic music indie pop punk garage rock sound art and DIY computer music among others It examines these Hong Kong underground music practices in relief with specific case studies in Mainland China and Japan to begin re defining the notion of a musical underground in the context of contemporary Hong Kong The Routledge Companion to Visual Organization Emma Bell, Samantha Warren, Jonathan E. Schroeder, 2014-01-23 The visual constitutes an increasingly significant element of contemporary organization as post industrial societies move towards economies founded on creative and knowledge intensive industries The visual has thereby entered into almost every aspect of corporate strategy operations and communication reconfiguring basic notions of management practice and introducing new challenges in the study of organizations This volume provides a comprehensive insight into the ways in which organizations and their members visualize their identities and practices and how they are viewed by those who are external to organizations including researchers With contributions from leading academics across the world The Routledge Companion to Visual Organization is a valuable reference source for students and academics interested in disciplines such as film studies entrepreneurship marketing sociology and most importantly organizational behaviour **Movement, Time, Technology, and Art** Christina Chau, 2017-06-12 This book explores the ways in which artists use technology to create different perceptions of time in art in order to reflect on contemporary relationships to technology By considering the links between technology movement and contemporary art the book explores changing relationship between temporality in art art history media art theory modernity contemporary art and digital art This book challenges the dominant view that kinetic art is an antiquated artistic experiment and considers the changing perception of kinetic art by focusing on exhibitions and institutions that have recently challenged the notion of kinetic art as a marginalised and forgotten artistic experiment with mechanical media This is achieved by deconstructing Frank Popper's argument that kinetic art is a precursor to subsequent explorations in the intersections between art science and technology Rather than pandering to the prevailing art historical assumption that kinetic sculpture is merely a precursor to art in a digital culture the book proposes that perhaps kineticism succeeded too well where movement has become a ubiquitous element of the aesthetic of contemporary art If as Boris Groys has recently suggested installation has become the dominant mode of art in the contemporary age then movement in real time with the viewer is used to aestheticise and explore the facets of our peculiar time *When Luxury Meets Art* Olga Louisa Kastner, 2013-12-05 Increasingly luxury brands join forces with the arts today Yet these cross over collaborations do

not constitute a homogeneous strategy but become manifest in manifold forms and appearances Regardless of their growing practical relevance for the creation of contemporary luxury brands though the varied forms of Luxury Brand Art Collaborations LBACs have remained largely unexplored to date Olga Louisa Kastner aims at systematizing the dominating collaborative patterns between luxury brands and the arts She empirically derives distinct types of LBACs based on methodically developed attributes and a large number of real cases Finally the author describes the main characteristics of the identified types and illustrates them by prototypical cases
