## **Does Technology Drive History Dilemma Of Technological Determinism:**

**Does Technology Drive History?** Merritt Roe Smith, Leo Marx, 1994-06-02 These thirteen essays explore a crucial historical question that has been notoriously hard to pin down. To what extent and by what means does a society's technology determine its political, social, economic, and cultural forms? These thirteen essays explore a crucial historical question that has been notoriously hard to pin down. To what extent and by what means does a society's technology determine its political, social, economic, and cultural forms? Karl Marx launched the modern debate on determinism with his provocative remark that "the hand mill gives you society with the feudal lord; the steam mill, society with the industrial capitalist." A classic article by Robert Heilbroner reprinted here renewed the debate within the context of the history of technology. This book clarifies the debate and carries it forward. Marx's position has become embedded in our culture in the form of constant reminders as to how our fast changing technologies will alter our lives. Yet historians who have looked closely at where technologies really come from generally support the proposition that technologies are not autonomous but are social products susceptible to democratic controls. The issue is crucial for democratic theory. These essays tackle it head on, offering a deep look at all the shadings of determinism and assessing determinist models in a wide variety of historical contexts. Contributors: Bruce Bimber, Richard W. Bulliet, Robert L. Heilbroner, Thomas P. Hughes, Leo Marx, Thomas J. Misa, Peter C. Perdue, Philip Scranton, Merritt Roe Smith, Michael L. Smith, John M. Staudenmaier, Rosalind Williams.

## **Technology and International Transformation**

Geoffrey L. Herrera, 2012-02-01 During an era in which the pace of technological change is unrelenting, understanding how international politics both shapes and is shaped by technology is crucial. Drawing on international relations theory, historical sociology, and the history of technology, Geoffrey L. Herrera offers an ambitious, theoretically sophisticated, and historically rich examination of the interrelation between technology and international politics. He explores the development of the railroad in the nineteenth century and the atomic bomb in the twentieth century to show that technologies do not stand apart from but are intimately related to even defined by international politics.

Im Zentrum der Erörterung steht die Rolle der internationalen Staatengesellschaft angesichts zunehmend globalisierter politischer Problemfelder. Der Autor veranschaulicht seine Perspektive in vier großen Fallstudien zu den Themen Kolonialismus, Nationalismus, Demokratie und Frieden sowie humanitäre Intervention. **Konzepte und Verfahren der Technikfolgenabschätzung** Georg Simonis, 2013-06-13 Der Band beschäftigt sich mit dem Spannungsverhältnis zwischen Technik und Gesellschaft. In neun knappen Kapiteln werden die Forschungs- und Handlungsfelder des transdisziplinären Forschungs- und Beratungsprogramms, das sich unter der Schrift der Technikfolgenabschätzung versammelt, dargestellt. Das Buch wendet sich an Interessierte und Studierende aller Fachrichtungen, die sich mit der sozialkologischen Gestaltung technischer Systeme befassen. Nach der Lektüre sollen die Studierenden gelernt haben, welche die wichtigsten Konzepte und Verfahren der Technikfolgenabschätzung sind, warum die Erwartungen an die Leistungsfähigkeit von Technikfolgenabschätzung steigen und wie sie vorgelegt werden können. **Zinc for Coin and Brass** Hailian Chen, 2018-11-26 Hailian Chen's pioneering study presents the first comprehensive history of Chinese zinc, an essential base metal used to produce brass and coin over the long eighteenth century. Zinc, she argues, played a far greater role in the Qing economy and in integrating China into an emerging global economy than has previously been recognized. Using commodity chain analysis and exploring over 5,800 items of archival documents, Chen demonstrates how this metal was produced, transported, traded and consumed by human agents. Situating the zinc story within the human environment framework, this book covers a broad and interdisciplinary range of political economy, material culture, environment, technology and society, which casts new light on our understanding of early modern China. **Handbuch Kulturwissenschaftliche „Studies“** Jonas Nesselhauf, Florian Weber, 2024-11-04 Mit dem Cultural Turn öffnen sich nicht nur bisher eher hermetisch gebliebene geistes- und sozialwissenschaftliche Disziplinen für ein kulturwissenschaftliches Denken; es entstehen aus diesen Forschungen heraus neue Fachgrenzen überschreitende Ansätze. Eine zentrale Rolle hierbei spielen die Studies, interdisziplinäre Forschungsbereiche, die sich marginalisierten Themen zuwenden. Sie systematisch erschließen bspw. Women's Studies, Postcolonial Studies, etc., und letztlich auch selbst wieder Studies generieren aus den Women's Studies respektive den Gender Studies, etwa die Feminist Studies, Masculinity Studies, Fat Studies, Disability Studies und die Porn Studies. Diese hochspezialisierten und stark praxistheoretischen Ansätze sind mittlerweile weder aus den Literaturkultur- und Medienwissenschaften noch aus den Geschichts-, Politik- und Sozialwissenschaften wegzudenken. Gleichzeitig sind sie ein wissenschaftstheoretisch noch relativ unerschlossenes Gebiet. Das Handbuch Kulturwissenschaftliche Studies stellt mit einem Schwerpunkt auf den deutschsprachigen Kulturwissenschaften die Methoden und Konzepte der derzeit wichtigsten Studies.

**Digital Technologies in the Lives of Young People** Chris Davies, John Coleman, Sonia Livingstone, 2015-10-14 This book examines the presence and effects of new technologies in the lives of young people The rapid pace of change in the development and use of digital technologies and the likely impact this has on youth means that the topic has wide implications for educational institutions theory and practice There is a demand for a concentration on the ways in which new devices such as smart phones and tablets as well as new platforms and recent notions such as the flipped classroom are affecting the way education is being provided However there is also still a small minority who do not have full access to the internet and the disadvantages suffered by this group must also be addressed The internet offers a vast range of opportunities for young people and yet for various reasons it is not always available This can partly be attributed to the controls that schools impose on the use of digital technology for reasons of safety and security and

can in part be explained by the fact that policy makers have contradictory attitudes to technology While they may argue for the need to have a well educated and well trained workforce they fear the threats to privacy and safety posed by the internet This book asserts that society needs to have more open debate about the threats and opportunities of digital technology as it is a dynamic and ever changing topic for us all This book was originally published as a special issue of the Oxford Review of Education
