initiated by the government and researchers and their evaluations that have guided the formulation of health reform policies. It provides information on how to make reforms work at the local and provincial levels. The findings detailed in this volume will contribute to a global knowledge base in health care reforms. Volume 2 provides a comprehensive review and evaluation of the Japanese health care system. Japan has a long history of health care system development and provision of universal health coverage with a mature and well developed health care system among East Asian countries. However, due to increases in health care costs, economic stagnation, and the country's rapidly aging population, Japan has undergone significant health care reform during the last two decades, both in the delivery as well as financing of health services in its hospital sector, medical technology sector, and long term care insurance. Despite these challenges and reforms, health outcomes among the Japanese population have been progressively among the best in the world. This volume shows how policy research can lead to policy analysis, implementation, and assessment. It also provides valuable lessons learnt for mutual learning among other health care systems. Volume 3 offers a comprehensive review of the developments in South Korea's national health insurance system since 1989 in terms of financing, delivery systems, and outcomes. The volume analyzes the efficiency of cost and service delivery by public sectors versus private sectors. It points out areas of challenge to future Korean health care reform. Chapter authors in this volume are leading experts involved in Korean health care policy implementation. Volume 4 reviews the development and achievements of Taiwan Health Insurance since 1995. Because of its continuous reform in payment, services delivery, and pharmaceutical technology, Taiwan has been considered a model example of universal health insurance among global health systems. This volume shows the processes used to translate policy research findings into policy changes. While the health care reform in Taiwan is ongoing, the Taiwan example provides a real world and practical understanding of health care system changes. In summary, this four volume set makes an outstanding contribution to health care system reform and policy research based on solid scholarly work. It also introduces policy researchers and academic communities to current debates about health systems, health financing, and universal health coverage. This reference volume is a must for anyone keen on East Asia's health care system reform dynamics and changing scene.

Acute Nursing Care Helen Dutton, Ian Peate, 2020-11-29. Delays in recognising deterioration or inappropriate management of people in acute care settings can result in late treatment, avoidable admissions to intensive care units, and in some instances unnecessary deaths. As the role of the nurse in healthcare settings continues to change and evolve, today's nursing and other healthcare students need to be equipped with the fundamental skills to recognise and manage deterioration in the patient in a competent and confident manner, appreciating the complexities of caring for those who are acutely unwell, as you learn to become practitioners of the future. Using a body systems approach and fully updated in light of new NEWS2 and NMC future nurse standards, as well as acknowledging the challenges faced by people with delirium in acute care settings, the second edition of this book provides a comprehensive overview of the essential issues in this important subject. Topics covered include recognition and

identification of physiological and mental deterioration in adults identification of disordered physiology that may lead to a medical emergency linked to deterioration of normal function relevant anatomy and physiology pathophysiological changes and actions that need to be taken immediate recognition and response investigations diagnosis and management issues and teaching and preventative strategies Including case studies and test yourself questions this book is an essential tool for student nurses who are required to undertake acute care experiences and are assessed in theory and practice *The*
