Robert Sabol, 2014-04-04 Assessing Expressive Learning is the only book in the art education field to date to propose and support a research supported teacher directed authentic assessment model for evaluating K 12 studio art and to offer practical information on how to implement the model This practical text for developing visual arts assessment for grades 1 12 is based on and supported by the results of a year long research effort primarily sponsored by the National Endowment for the Arts involving 70 art teachers and 1 500 students in 12 school districts in Florida Indiana and Illinois The purpose of the study was to demonstrate that creative artwork by K 12 students can be empirically assessed using quantitative measures that are consistent with the philosophical assumptions of authentic learning and with the means and ends of art and that these measures can reliably assess student art growth A further goal was to provide a rationale for the assessment of student art as an essential part of the K 12 instructional program and to encourage art teachers to take

responsibility for and assume a leadership role in the assessment of art learning in the school and the school district

Assessing Expressive Learning reports on current assessment methods but also stresses a time tested portfolio assessment process that can be used or adapted for use in any K 12 art classroom includes the assessment instruments used in the study and several case studies of art teachers using electronic portfolios of student work a bibliography of major art assessment efforts and a critical review of current methods is designed to be teacher and system friendly unlike many other art assessment publications that provide only a review of information on assessment and both documents an experiment where artistic values and aesthetic issues were considered paramount in the education of K 12 students in the visual arts and also serves as a guide for the conduct of similar experiments by art teachers in the nation s schools the research methodology and results are reported in an appendix in a format that will enable educational researchers to duplicate the study This volume is ideal as a text for upper division undergraduate and graduate classes in visual arts education assessment and highly relevant for college art education professors researchers and school district personnel involved in the education and supervision of art teachers and researchers interested in performance measurement

Activism Afonso Dias Ramos, Tom Snow, 2023-10-24. An edited collection that addresses the vital intersection of contemporary art and activism in this watershed cultural moment. Activism is a critical point of contention for institutions and genealogies of contemporary art around the world. Yet artists have consistently engaged in activist discourse, lending their skills to social movements and regularly participating in civil and social rights campaigns while also boycotting cultural institutions and exerting significant pressure on them. This timely volume, edited by Tom Snow and Afonso Ramos, addresses an extraordinary moment in debates over the institutional frameworks and networks of art, including large-scale direct actions as well as a radical rethinking of art venues and urban spaces according to racial, class, or gender-based disparities, including demonstrations against the extractive and exploitative practices of neoliberal accumulation and climate catastrophe. From ACT UP and its affiliate groups since the dawn of the AIDS crisis to the counter-spectacle and street theatrics of the so-called Arab Spring and Occupy to ongoing protest movements such as Black Lives Matter, Rhodes Must Fall, and Decolonize This Place, activist aesthetics has proven increasingly difficult to define under traditional classifications. Resurgent campaigns for decolonial reckoning, ecological justice, gender equality, indigenous rights, and antiracist pedagogies indicate that the role of activism in contemporary art practice urges a critical reassessment. One pressing question is whether contemporary art's most radical politics now takes place outside, against, or in spite of conventional sites of display such as museums, biennials, and galleries. Artists surveyed include ACT UP, Basel Abbas, Ruanne Abou Rahme, Allora Calzadilla, Tania Bruguera, Black Audio Film Collective, Chto Delat, Andrea Fraser, Nan Goldin, Sanja Iveković, Gulf Labor, Amar Kanwar, Leslie Labowitz, Liberate Tate, Sethembile Msezane, Zanele Muholi, Jan Nikolai Nelles, Nora Al-Badri, Decolonize This Place, Michael Rakowitz, Oliver Ressler. Writers include Dave Beech, Judith Butler, Amílcar Cabral, Elias Canetti, Douglas Crimp, Jodi Dean, Gilles Deleuze, T.J. Demos, Nina Dubrovsky, Sreyya Evren, Catherine Flood, Matthew Fuller, David Graeber, Gavin Grindon, Félix Guattari, Brian Holmes, Carrie Lambert Beatty, Lucy Lippard, Yates McKee, MTL Collective, Gregory Sholette, Françoise Vergès, Peter Weiss, Eyal Weizman.

The Representation of Space in Graeco-Roman Art Michael Koortbojian,2023-11-06 This book assesses the role of relief in the representation of space in Graeco Roman artistic practice and its study from Winckelmann to the mid twentieth century when Classical art developed as a theoretical discipline The role of relief in the history of ancient sculpture has long been acknowledged yet the problems posed by an engagement with the representation of space have not been a subject of specific and sustained inquiry Neither a conventional history nor a comprehensive historiography this book traces the study of relief of its formal character its artistic purpose its aesthetic significance and its historical treatment The contribution to scholarship is three fold 1 By means of a wide array of examples the book demonstrates that the visual strategies employed to represent space during the Graeco Roman period were a continuously evolving repertory tied to the refinement of techniques and the transformation of styles that those techniques brought into being 2 It examines ideas now commonplace based on scholarship now long neglected if not completely forgotten And 3 it reveals how competing interpretations of the representation of space in relief elaborated new approaches to the monuments and their representations Cyber Security Intelligence and Analytics Zheng Xu,Saed Alrabaae,Octavio Loyola-González,Xiaolu Zhang,Niken Dwi Wahyu Cahyani,Nurul Hidayah Ab Rahman,2022-02-26 This book presents the outcomes of the 2022 4th International Conference on Cyber Security Intelligence and Analytics CSIA 2022 an international conference dedicated to promoting novel theoretical and applied research advances in the interdisciplinary field of cyber security particularly focusing on threat intelligence analytics and countering cyber crime The conference provides a forum for presenting and discussing innovative ideas cutting edge research findings and novel techniques methods and applications on all aspects of cyber security intelligence and analytics

Mondrian's Philosophy of Visual Rhythm Eiichi Tosaki, 2017-11-15 This volume investigates the meaning of visual rhythm through Piet Mondrian's unique approach to understanding rhythm in the compositional structure of painting drawing reference from philosophy aesthetics and Zen culture Its innovation lies in its reappraisal of a forgotten definition of rhythm as stasis or composition which can be traced back to ancient Greek thought This conception of rhythm the book argues can be demonstrated in terms of pictorial strategy through analysis of East Asian painting and calligraphy with which Greek thought on rhythm has identifiable commonalities The book demonstrates how these ideas about rhythm draw together various threads of intellectual development in the visual arts that cross disparate aesthetic cultural practices As an icon of early 20th Century Modernism Mondrian's neoplasticism is a serious painterly and philosophical achievement In his painting Mondrian was deeply influenced by Theosophy which took its influence from Eastern aesthetics particularly East Asian and Indian thought However Mondrian's approach to visual rhythm was so idiosyncratic that his contribution to studies of visual rhythm is often under recognized This volume shows that a close inspection of Mondrian's own writing thinking and painting has much to tell scholars about how to understand a long forgotten aspect of visual rhythm Rodin's famous criticism of photography athlete in motion is forever frozen can be applied to Muybridge's zoopraxiscope the Futurists rendition of stroboscopic images and Duchamp's *Nude Descending a Staircase* Through a comparative study between Mondrian's painting and these seminal works this volume initiates a new convention for the cognition of the surface of painting as visual rhythm Mondrian's simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian's theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader's encounter with the works of Mondrian Prof Kathleen Higgins
