Bribes, Bullets, and Intimidation Julie Marie Bunck,Michael Ross Fowler,2015-06-15 Bribes, Bullets, and Intimidation is the first book to examine drug trafficking through Central America and the efforts of foreign and domestic law enforcement officials to counter it. Drawing on interviews, legal cases, and an array of Central American sources, Julie Bunck and Michael Fowler track the changing routes, methods, and networks involved while comparing the evolution and consequences of the drug trade through Belize, Costa Rica, Guatemala, Honduras, and Panama over a span of more than three decades. Bunck and Fowler argue that while certain similar factors have been present in each of the Central American states, the distinctions among these countries have been equally important in determining the speed with which extensive drug trafficking has taken hold, the manner in which it has evolved, the amounts of different drugs that have been transshipped, and the effectiveness of antidrug efforts.

Tactics for Criminal Patrol Charles Remsberg,1995-01-01 Insider patrol tactics you can start using right now to safely turn ordinary traffic stops into major felony arrests of drug couriers, gun traffickers, and other violent criminals. Brings you step by step the rarely shared techniques of elite officers who are already producing spectacular results while staying alive and legally unscathed. Once you learn the secrets of sensory pat-downs, deception, detection strategies for searches, and single officer self-defense, your vehicle stops will never again be the same.

From Pablo to Osama Michael Kenney,2010-11 From Pablo to Osama is a comparative study of Colombian drug smuggling enterprises, terrorist networks including al Qaeda, and the law enforcement agencies that seek to dismantle them. Drawing on a wealth of research materials, including interviews with former drug traffickers and other hard-to-reach informants, Michael Kenney explores how drug traffickers, terrorists, and government officials gather, analyze, and apply knowledge and experience. The analysis reveals that the resilience of the Colombian drug trade and Islamist extremism in wars on drugs and terrorism stems partly from the ability of illicit enterprises to change their activities in response to practical experience and technical information. Store this knowledge in practices and procedures and select and retain routines that produce satisfactory results. Traffickers and terrorists learn, building skills, improving practices, and becoming increasingly difficult for state authorities to eliminate. The book concludes by exploring theoretical and policy implications, suggesting that success in wars on drugs and terrorism depends less on fighting illicit networks with government intelligence and more on conquering competency traps that compel policy makers to exploit militarized enforcement strategies repeatedly without questioning whether these programs are capable of producing the intended results.
