Egalitarian Dynamics Bruce Kapferer, Marina Gold, 2024 Liminality the state of being betwixt and between is one of anthropology's most influential concepts This volume reconsiders Victor Turner's innovative extension of Arnold Van Gennep's concept of liminality from within the Manchester tradition of Social Anthropology established by Max Gluckman Turner's work was grounded in ethnography and engaged with philosophical perspectives in varied socio historical contexts extending well beyond the confines of the anthropology that initially inspired much of his work Liminality has therefore become a concept with broad interdisciplinary reach Engaging with topical issues across the globe from neuroscience to open access publishing and refugee experiences in Europe this volume launches Turner's fundamental work into the future

Landscape Ecology for Sustainable Society Sun-Kee Hong, Nobukazu Nakagoshi, 2018-03-23 The research category of the landscape ecology which researches the structure functions and the spatio temporal changes of the ecological landscapes has now been contributing to the human life and the shifts of the socio economic paradigm Global warming has been influencing the universal life patterns of the mankind which have been maintained in the past several hundreds of years And it has been having the influences on the international social problems and economic problems Although the diverse plans for adapting to the climate changes have been the topics of the conservations among the ecologists internationally it is the reality that the speed of the changes of the environment has been quicker than the time it takes to complete the solutions In order to maintain the sustainable earth and the sustainable society the role of the landscape ecology has been coming to the fore Especially the theories and the methodologies of the landscape ecology have been applied to the multidisciplinary researches by going beyond the research category of ecology including the maximization of the efficiencies of the land spaces the management of the ecological space habitats in which the biological diversity can be maintained the utilization of the resources that are absolutely needed by the human beings Here it is compressed to water energy and food etc and until reaching the human society It is considered that to that extent the utilizations and the applications of the landscape ecology are very much needed for the diagnoses and the evaluations of the global environmental problems which have been proceeded with rapidly in the modernity This book is not comprised of any general remarks that explain the theories and the methods of the landscape ecology Already based on the basic theories of the landscape ecology the writers have conducted the investigations on the farm villages the cities and the coastal ecosystems And through the space analyses and interpretations the structure and functions of the landscapes were analyzed Of course in this book too the diverse ecosystems and the landscape ecological methodologies regarding the land use have been presented However the core of this book focuses more on what role the landscape ecology must play for the materialization of a sustainable society in the future At the farm villages the sustainable agriculture will be presented and at the cities the discussions on the green networks and the

energies will be proceeded with Also regarding the coasts and the seas a thesis on the safety of the life zones of the residents adjacent to the sea and on the conservation of the island ecosystems will be presented The sustainable society is a system that is formed by having the sustainable development as a basis It is considered to be one aspect within a kind of a sustainable process with regard to which the natural world and the human world coexist and are in a symbiotic relationship harmoniously In order to maintain the biodiversity the reasonable adjustments of the human activities like the use of the resources are absolutely needed Without the biological resources the cultural diversity of the human beings too cannot exist Consequentially recently and internationally there are a lot of the case examples that express the biocultural diversity by linking the biological diversity with the cultural diversity In this book the role of the landscape ecology as an academic link which can connect the two possible if possible is highly expected It is indeed the biocultural landscape It can be said that this concept also is the interconnection of the multidisciplinary spaces that must be dealt with in the modern landscape ecology Through this book it is intended to present a new directionality which can contribute to the sustainable society at the same time as the organization of the theories and the methods of the landscape ecology Research Methods in Defence Studies

Delphine Deschaux-Dutard,2020-08-09 This textbook provides an overview of qualitative and quantitative methods used in different social sciences to investigate defence issues Recently defence issues have become of increasing interest to researchers in the social sciences but they raise specific methodological questions This volume intends to fill a gap in the literature on defence studies by addressing a number of topics not dealt with sufficiently before The contributors offer a range of methodological reflections and tools from various social sciences political science sociology geography history economics and public law for researching defence issues They also address the increasingly important question of data and digitalization The book introduces the added value of quantitative and qualitative methods and calls for a cross fertilization of methods in order to facilitate better research on defence topics and to fully grasp the complexity of defence in the 21st century This book will be of much interest to students researchers and practitioners of defence studies war studies military studies and social science research methods in general **Urban Commons, Future Smart Cities and Sustainability**

Finance and Law in the Metaverse World Nadia Mansour,Lorenzo M. Bujosa Vadell,2024-12-05 This edited volume examines the impact of the metaverse on finance and law As the commercial development of the internet and digital technology has done for more than thirty years the metaverse phenomenon raises questions about the relevance of existing legal rules in dealing with new practices between the need for adaptation evolution or new rules While the Blockchain ecosystem has developed steadily over the last few years and its applications are still evolving can we assume that the metaverse will become the most prodigious phenomenon of the 21st century The term metaverse refers to a virtual world Technically using known but evolving technologies the term refers to a network of 3D virtual worlds In its current state of development there is a metaverse and not a single virtual world as there is an internal one simply because its development is still dependent on proprietary technologies The development of the metaverse is no less accurate and a few recent examples suggest that lawyers will not be able to escape this phenomenon which looks set to involve individuals companies and institutions The financial world is not immune to the emergence of the metaverse either Traditional finance is moving into new virtual worlds Several banks and insurance companies are entering this world far removed from their traditions Some

have even set up branches there However what are these financial institutions trying to achieve by entering this market segment This book addresses these questions with contributions from academics and experts from both fields
