A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings and is based on the International Classification for Functioning, Disability and Health (ICF) model, the one adopted by the APTA. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies, especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies, and APTA guidelines, including incorporation of new terminology from the *Guide to Physical Therapist 3.0* and ICD-10 coding.
