Merritt Roe Smith, Leo Marx, 1994-06-02 These thirteen essays explore a crucial historical question that has been notoriously hard to pin down To what extent and by what means does a society's technology determine its political social economic and cultural forms These thirteen essays explore a crucial historical question that has been notoriously hard to pin down To what extent and by what means does a society's technology determine its political social economic and cultural forms Karl Marx launched the modern debate on determinism with his provocative remark that the hand mill gives you society with the feudal lord the steam mill society with the industrial capitalist and a classic article by Robert Heilbroner reprinted here renewed the debate within the context of the history of technology This book clarifies the debate and carries it forward Marx's position has become embedded in our culture in the form of constant reminders as to how our fast changing technologies will alter our lives Yet historians who have looked closely at where technologies really come from generally support the proposition that technologies are not autonomous but are social products susceptible to democratic controls The issue is crucial for democratic theory These essays tackle it head on offering a deep look at all the shadings of determinism and assessing determinist models in a wide variety of historical contexts Contributors Bruce Bimber Richard W Bulliet Robert L Heilbroner Thomas P Hughes Leo Marx Thomas J Misa Peter C Perdue Philip Scranton Merritt Roe Smith Michael L Smith John M Staudenmaier Rosalind Williams

can in part be explained by the fact that policy makers have contradictory attitudes to technology While they may argue for the need to have a well educated and well trained workforce they fear the threats to privacy and safety posed by the internet This book asserts that society needs to have more open debate about the threats and opportunities of digital technology as it is a dynamic and ever changing topic for us all This book was originally published as a special issue of the Oxford Review of Education *Handbook of Research on E-Learning Applications for Career and Technical Education: Technologies for Vocational Training* Wang, Victor X.,2009-05-31 Provides an authoritative reference collection on leading international insights into the integration of technology tools and applications with adult and vocational instruction Privacy in America William Aspray,Philip Doty,2011-07-11 In this collection of essays that represent original and interdisciplinary work respected scholars address a number of privacy issues These include how governmental and private sectors develop and deploy technologies that can pose serious compromises to the privacy of individuals and groups how information and communication system designs pose threats to privacy how we manage private concerns child care job leave and identity as public issues amenable to political action and shared awareness and the fundamental asymmetry of power that exists between individuals and small groups on the one hand and large governmental and corporate entities on the other Arranged in three sections law and policy information technology and information studies history and sociology Privacy in America Interdisciplinary Perspectives will be useful to scholars practitioners and students in a variety of fields including information science library science and information systems Religion and Transhumanism Calvin Mercer,Tracy J. Trothen,2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest **Neue Wege in ein neues Europa** Ralf Roth,Karl Schlögel,2009-04-14 Seit dem Zusammenbruch der Sowjetunion f gt sich Europa neu zusammen Europa ist aber nicht nur ein Raum von Werten und Ideen sondern auch ein Verkehrsraum Das geteilte Europa war bestimmt von zerschnittenen Verkehrswegen mit Endstationen an den Grenzen zwischen West und Ost 1989 begann man gerissene Linien
