Interpreting Weight Jeffery Sobal,2017-07-05 What is too fat what is too thin Interpretations of body weight vary widely across and within cultures Meeting weight expectations is a major concern for many people because failing to do so may incur dire social consequences such as difficulty in finding a romantic partner or even in locating adequate employment without these social and cultural pressures body weight would only be a health issue while socially constructed standards of body weight may seem immutable they are continuously recreated through social interactions that perpetuate or transform expectations about fatness and thinness Written by sociologists psychologists and nutritionists all of the chapters in this book focus on how people construct fatness and thinness examining different strategies used to interpret body weight such as negotiating weight identities reinterpreting weight and becoming involved in weight related organizations Together these chapters emphasize the many ways that people actively define construct and enact their fatness and thinness in a variety of settings and situations A Primer on Clinical Experience in Medicine Milos Jenicek, MD,2012-08-08 Mastery of quality health care and patient safety begins as soon as we open the hospital doors for the first time and start acquiring practical experience The acquisition of such experience includes much more than the development of sensorimotor skills and basic knowledge of the sciences It relies on effective reasoning decision making and communication shared by all health professionals including physicians nurses dentists pharmacists physiotherapists and administrators A Primer on Clinical Experience in Medicine Reasoning Decision Making and Communication in Health Sciences is about these essential skills It

describes how physicians and health professionals reason make decisions and practice medicine Covering the basic considerations related to clinical and caregiver reasoning it lays out a roadmap to help those new to health care as well as seasoned veterans overcome the complexities of working for the well being of those who trust us with their physical mental and spiritual health The book provides a step by step breakdown of the reasoning process for clinical work and clinical care It examines both general and medical ways of thinking reasoning argumentation fact finding and using evidence Outlining the fundamentals of decision making it integrates coverage of clinical reasoning risk assessment diagnosis treatment and prognosis in evidence based medicine It also Describes how to evaluate the success effectiveness and cure and failure error and harm of clinical and community actions Considers communication with patients and outlines strategies successes failures and possible remedies including offices bedside intervention and care settings Examines strategies successes failures and possible remedies for communication with peers including interpersonal communication morning reports rounds and research gatherings The book describes vehicles opportunities and environments for enhanced professional communication including patient interviews clinical case reports and morning reports It includes numerous examples that demonstrate the importance of sound reasoning decision making and communication and also considers future implications for research management planning and evaluation

Science, God's Hard Gift Frederick R. Bauer, 2010-12 Frederick R Bauer captures the essence of William James in Science God's Hard Gift We have all heard the word pragmatic It entered our everyday vocabulary as a result of a series of lectures delivered by William James the greatest of all great American thinkers He gave those lectures in 1906 four years before his death at age sixty eight in 1910 In the first of those lectures James described the type of person he wanted to reach a person not unlike a large number of persons today He wants facts he wants science James said but he also wants a religion James did not live to see the incredible new scientific discoveries of the 1900s Those discoveries have led increasing numbers of experts to claim that modern science has made religion obsolete Science God's Hard Gift celebrates this centenary of James's death by updating and expanding his ideas on pragmatism for those contemporaries who want facts and science but also a religion

Wake Beth Goldner, 2003-07-17 In her first collection of short stories Beth Goldner looks at loss of love of health of life through the lives of ordinary women in extraordinary circumstances The women of Wake are suffering or have suffered a profound loss loss that has left them seeking renewal or perhaps just escape Sometimes they long for a husband a baby a trinket sometimes for something far more elusive In the title story two sisters are slowly losing their parents to mental illness In Cardiff by the Sea a man who lost his sight in Vietnam is reborn through a new relationship with a daughter he didn't know he had In Plan B a woman loses her husband to an affair with a much younger woman and loses her grip on sanity at the same time In Outcomes we meet a hospice worker who steals an inconsequential token from the patients she watches die her own strange unethical but intimate ritual to the life cycle This bravura performance from a fresh literary voice bringing together a diversity of

characters in various stages of life will touch and surprise readers as it reveals some of life's smallest but most rewarding possibilities

When AIDS Began Michelle Cochrane, 2004-08-02 By examining the early outbreaks in San Francisco Cochrane unfolds the creation of AIDS in one geographic location and then traces how and why major claims about the transmission of HIV were made extrapolated and then disseminated to the rest of the world all important factors in understanding this disease

The Fake and Deceptive Science Behind Roe V. Wade Thomas W. Hilgers, 2020-08-20 Our schools and healthcare institutions have abandoned the Hippocratic Oath and the Declaration of Geneva and replaced it with a policy of lethalism This is a direct result of the Court's acceptance and promotion of archaic scientific reasoning Roe v Wade that at best would be considered pre medieval and clearly out of touch with scientific reality Fallout includes the expansion into fetal experimentation human cloning embryonic stem cell research infanticide and even physician assisted suicide programs The respect for life ethic has slowly been removed as the Supreme Court has so strongly supported the lethalism becomes a way of life ethic Especially interesting is the lack of support for any positive solutions to these issues The recognition is that life at all stages in the womb is precious and able to make extraordinary contributions to our ability to love and to be loved to bring about peace and to be at peace to extract love in ways that only a very young and precious life is able to extract and to express love in ways that can be boundlessly meaningful As we move to reestablish the human right to live we must also move beyond lethalism and install positive life affirming and meaningful solutions to real human problems God bless us all as we move in this direction

Roenigk & Roenigk's Dermatologic Surgery Randall K. Roenigk, Henry H.
