Media, Conflict and Peacebuilding in Africa Jacinta Maweu, Admire Mare, 2021-03-29 This book explores the role and place of popular traditional and digital media platforms in the mediatization representation and performance of various conflicts and peacebuilding interventions in the African context The role of the media in conflict is often depicted as either good as symbolized by peace journalism or bad as exemplified by war journalism but this book moves beyond this binary to highlight the in between role that the media often

plays in times of conflict The volume does not only focus on the relationship between mass media conflict and peacebuilding processes but it broadens its scope by critically analysing the dynamic and emergent roles of popular and digital media platforms in a continent where the semi literate and oral communities still rely heavily on popular communication platforms to get news and information Whilst social media platforms have been hailed for their assumed democratic and digital dividends this book does not only focus on these positive aspects but also shines a light on dark forms of participation which are fuelling racial gender ethnic political and religious conflicts in highly polarized and stratified societies Highlighting the many ways in which traditional digital and popular media can be used to both escalate conflicts and promote peacebuilding this volume will be a useful resource for students researchers and civil society groups interested in peace and conflict studies journalism and media studies in different contexts within Africa **Blood, Metal and Dust** Ben Barry, 2020-11-26

idea of the society of consumers is to prevent needs from being satisfied and to create demand its natural extension is to enable consumers to consume more by borrowing Debt was transformed into a crucial profit earning asset of capitalism in liquid modern times The present day credit crunch is not the outcome of the banks failure but rather the fruit of their success in transforming the majority of men and women young and old into a race of debtors They got what they were looking for a society of debtors whose condition of being in debt was made self perpetuating with more debts being offered and more undertaken as the only way of escaping from the debts already incurred Starting from this reflection on the current global financial crisis and prompted by the probing questions of his interlocutor Citlali Roviroso Madrazo Bauman examines in an historical perspective some of the most pressing moral and political issues of our time from international terrorism and the rise of religious and secular fundamentalism to the decline of the nation state and the threats posed by global warming issues whose seriousness and urgency attest to the fact that we are living today not only on borrowed money but also on borrowed time

The Digital Social Alpha Possamai-Inesedy, Alan Nixon, 2019-12-02 The edited volume aims to present a critical analysis of the current state of research on religion and belief systems in the realm of the Digital Social The rapid expansion and democratization of digital technologies in conjunction with the significant shifts taking place within the practices of religion and belief through digital technology demand a critical examination across the social sciences and humanities These changes call for an overview of not only our current methodological tool box but also the epistemological and ethical considerations that researchers must contend with The proposed volume provides a critical framework that recognizes that the social and therefore the religious cannot be fully understood without recognizing how the digital world actively constitutes notions such as identity social networks embodiment and social institutions While some specific methods will be discussed the volume s emphasis remains on the critical epistemological and logistical considerations that are needed when undertaking this form of research

Just Security in an Undergoverned World William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity s future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues

however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors. It offers just security as a new framework for charting innovative solutions and strategies for effective and essential global governance.

Heidegger and the Global Age Antonio Cerella, Louiza Odysseos, 2017-10-18 Globalization is one of the most contested and abused concepts of our time Whether one interprets it as a collective illusion or as the final stage of capitalism as uncontrollable multitude or as a radical opening of new spaces of freedom the global age represents the conceptual and existential background of our being in the world But what lies behind this process What mode of human existence is brought about by the age of technology and global mobilization And is it possible to attempt a unitary interpretation of this age that presents itself as both total and pluralistic This volume rethinks these epochal questions in light of Martin Heidegger's complex hermeneutics proposing at the same time that such questions enable the interrogation of some of its most fundamental aspects the metanarrative of *Seinsgeschichte* as withdrawal of Being the structure of human existence within the frame of technology the relation between humanism and nihilism as well as politics and technology the changing character of subjectivity in the age of the world picture the mythopoeic force of art and the uprooting of human beings As this volume shows interrogating Heidegger's thought has significant potential for both International Political Theory and also the analysis of specific concepts and dynamics in contemporary international studies such as the changing character of spatiality temporality and subjectivity
