on elements of both logico mathematical frameworks e g type systems and graph theory and conceptual philosophical paradigms e g linguistics and cognitive science The authors embrace this two sided aspect of data models by seeking non reductionistic points of convergence between formal and humanistic conceptual viewpoints and by leveraging biomedical contexts viz COVID Cancer and Cardiac Care so as to provide motivating examples and case studies in this volume Provides an analysis of how conceptual spaces and related cognitive linguistic approaches can inspire programming and query processing models Outlines the vital role that data modeling curation has played in significant medical breakthroughs Presents readers with an overview of how information management approaches intersect with precision medicine providing case studies of data modeling in concrete scientific practice Explores applications of image analysis and computer vision in the context of precision medicine Examines the role of technology in scientific publishing replication studies and dataset curation

Management innovation roadmap Vittorio D'Amato,2015-05-13T00:00:00+02:00 Management and leadership as we know them have come to an end We can t wait any longer most organizations use management models at least 50 years old and no longer suited to the new challenges Reinventing management and leadership is crucial as the competitive advantage is not achieved only with a good business model but also with a valid management model A business model without a management model is pure theory as well as a model of management without a business model is losing The book after having faced and declined the difference between business model and management model proposes a new management model management 3 0 and what the new manager 3 0 has TO DO in order to enable employees to do their best and to be fully engaged
