

5 DESCRIPTION OF CONTROLS

NOTE: The following descriptions detail the sequences followed by a module containing the standard 'factory configuration'. Always refer to your configuration source for the exact sequences and timers observed by any particular module in the field.

Control of the module is via push buttons mounted on the front of the module with **Stop/Reset Mode** (⏻), **Auto Mode** (⏻) and **Manual/Start Mode** (⏻) functions. For normal operation, these are the only controls which need to be operated. Details of their operation are provided later in this document.

CAUTION: The module may instruct an engine start event due to external influences. Therefore, it is possible for the engine to start at any time without warning. Prior to performing any maintenance on the system, it is recommended that steps are taken to remove the battery and isolate supplies.
