IMPROVING SCHOOLS FOR AFRICAN AMERICAN STUDENTS Sheryl J. Denbo,Lynson Moore Beaulieu,2002-01-01

Improving Schools for African American Students is designed to provide educational leaders with a better understanding of

how to recognize the diversity of strengths that Black students bring with them to school and how to use these strengths to improve achievement. The articles contained in this book discuss generic education issues such as policy reform, the importance of high quality teaching and the improvement of schools from the perspective of the academic achievement of African American students. Part I explores institutional racism in the context of America's public schools and provides suggestions for educational leaders to eliminate harmful policies and practices within educational institutions and settings. Part II discusses the kinds of institutional and instructional changes that are needed to support successful schooling of African American children and youth. Part III focuses on the challenges presented to African American students by the current high stakes testing environment that surrounds standards assessment and accountability. A review of the literature on schools that have succeeded in improving achievement for African American students at the elementary, middle, and high school levels with districts moving towards narrowing the achievement gap is included. This text examines a wide variety of policies, programs, practices, and research that will provide valuable insight. The emphasis throughout the book is on the ability of educators to successfully restructure their schools, offer high quality teaching and learning standards for African American students, and to make the kinds of changes that will result in high achievement for all students. Notices of the American Mathematical Society, American Mathematical Society, 1990.

Teaching Today's Mathematics in the Middle Grades Art Johnson, Kit Norris, 2006. *Teaching Today's Mathematics in the Middle Grades* provides current and future middle school teachers with the mathematics content, essential concepts, methodology, activities, and resources to both learn and teach mathematics in grades 5 to 8. The authors focus exclusively on the middle school learner and the middle school mathematics curriculum. Although each chapter discusses foundational mathematics concepts from earlier grades and previews topics that will follow the middle grades, the emphasis is on the middle school. This selective focus allows for proper development of critical topics in the middle school such as proportionality, algebraic thinking, and the integral role of manipulatives. Assessment practices and problem solving are also emphasized from the viewpoint of effective practices for middle school students. Unique Features: React and Reflect features prompt classroom discussions by asking the reader to think independently regarding a statement, issue, or concern. Try This features ask the reader to solve a problem first or extend the current discussion by working on an extension of a problem. By completing the problem first, teachers are putting themselves in the place of their students, helping the teacher discover first-hand common misconceptions. Numerous exercises and activities appear at the end of each chapter to reinforce student understanding of various topics and ensure mastery of the mathematics content. The NCTM Principles and Standards are emphasized throughout the book, beginning with a discussion in Chapter 1. Each of the content chapters 6-11 opens with the relevant NCTM content standards for that chapter. In addition, marginal icons highlight areas within the text in which the NCTM process standards are discussed. Reviewers rave. From the content organization and approach, it is evident that the authors have years of teaching experience.

This gives the text authority Marina Krause California State University Long Beach The authors do an excellent job of presenting in sequential order essential concepts methodology activities and technological resources essential to assist the beginning math teacher in preparing to teach in the middle school program Gerald Jarmon North Carolina Central University
