*Algorithmics of Matching Under Preferences* David F. Manlove, 2013 Matching problems with preferences are all around us OCo they arise when agents seek to be allocated to one another on the basis of ranked preferences over potential outcomes Efficient algorithms are needed for producing matchings that optimise the satisfaction of the agents according to their preference lists In recent years there has been a sharp increase in the study of algorithmic aspects of matching problems with preferences partly reflecting the growing number of applications of these problems worldwide This book describes the most important results in this area providing a timely update to The Stable Marriage Problem Structure and Algorithms D Gusfield and R W Irving MIT Press 1989 in connection with stable matching problems whilst also broadening the scope to include matching problems with preferences under a range of alternative optimality criteria

**Software Engineering for Science** Jeffrey C. Carver, Neil P.

Chue Hong, George K. Thiruvathukal, 2016-11-03 *Software Engineering for Science* provides an in depth collection of peer reviewed chapters that describe experiences with applying software engineering practices to the development of scientific software. It provides a better understanding of how software engineering is and should be practiced and which software engineering practices are effective for scientific software. The book starts with a detailed overview of the Scientific Software Lifecycle and a general overview of the scientific software development process. It highlights key issues commonly arising during scientific software development as well as solutions to these problems.
