Knowledge and Systems Engineering Van Nam Huynh, Thierry Denoeux, Dang Hung Tran, Anh Cuong Le, Son Bao Pham, 2013-10-01 The field of Knowledge and Systems Engineering KSE has experienced rapid development and inspired many applications in the world of information technology during the last decade The KSE conference aims at providing an open international forum for presentation discussion and exchange of the latest advances and challenges in research of the field These proceedings contain papers presented at the Fifth International Conference on Knowledge and Systems Engineering KSE 2013 which was held in Hanoi Vietnam during 17 19 October 2013 Besides the main track of contributed papers which are compiled into the first volume the conference also featured several special sessions focusing on specific topics of interest as well as included one workshop of which the papers form the second volume of these proceedings The book gathers a total of 68 papers describing recent advances and development on various topics including knowledge discovery and data mining natural language processing expert systems intelligent decision making computational biology computational modeling optimization algorithms and industrial applications Designing Reliable Distributed Systems Peter Csaba Ölveczky, 2018-02-12 This classroom tested textbook provides an accessible introduction to the design formal modeling and analysis of distributed computer systems The book uses Maude a rewriting logic based language and simulation and model checking tool which offers a simple and intuitive modeling formalism that is suitable for modeling distributed systems in an attractive object oriented and functional programming style Topics and features introduces classical algebraic specification and term rewriting theory including reasoning about termination confluence and equational properties covers object oriented modeling of distributed systems using rewriting logic as well as temporal logic to specify requirements that a system should satisfy provides a range of examples and case studies from different domains to help the reader to develop an intuitive understanding of distributed systems and their design challenges examples include classic distributed systems such as transport protocols cryptographic protocols and distributed transactions leader election and mutual exclusion algorithms contains a wealth of exercises including larger exercises suitable for course projects and supplies executable code and supplementary material at an associated website This self contained textbook is designed to support undergraduate courses on formal methods and distributed systems and will prove invaluable to any student seeking a reader friendly introduction to formal specification logics and inference systems and automated model checking techniques **Datenfernübertragung** Peter Welzel, 2013-03-09 1 1 Aufgaben der Datenübertragung und Datenfernverarbeitung Datenübertragung data transmission im folgenden mit D abgekürzt bedeutet die Übertragung von Daten zwischen unabhängig voneinander betriebenen informationsverarbeitenden Systemen Merkmale der D sind Übertragung der Signale mit annähernd Lichtgeschwindigkeit Für die Darstellung der Daten stehen nur elektrische bzw elektromagnetische Signale zur Verfügung Die Datenübertragung ist grundsätzlich zwischen Systemen verschiedener Hersteller und Betreiber möglich Zur Datenübertragung werden auch Medien

benutzt die nicht ausschließlich der Datenübertragung dienen. Die Daten liegen in digitaler Form vor. Die Daten werden seriell übertragen. Datenübertragung findet auch innerhalb der informationsverarbeitenden Systeme statt, z. B. beim Datenaustausch zwischen Prozessor und Speicher in einem EDV-System. Dieses Thema wird im folgenden nicht behandelt. Der Austausch von Daten zwischen Zentraleinheiten und Peripheriegeräten erfolgt aber oft nach Regeln der DSD, da dieses Thema in einigen Abschnitten des Buches behandelt wird. Datenfernverarbeitung (teleprocessing) im folgenden mit DFV abgekürzt bedeutet, da die Daten nicht an dem Ort verarbeitet werden, an dem sie entstehen oder benutzt werden. Die DFV ist eine Voraussetzung für die Datenfernverarbeitung. Prinzipien der DFV finden sich in mehreren Bereichen der Informationsverarbeitung:

- a) Klassische Datenfernübertragung (DF) gekennzeichnet durch grundsätzlich unbegrenzte Entfernung zwischen den Systemen, die Daten austauschen.
- b) Benutzung öffentlicher Übertragungseinrichtungen (public carriers) aus technischen, wirtschaftlichen und/oder aus rechtlichen Gründen.
- c) Nachrichtenmonopol. Es werden auch Netze verwendet, die nicht für die DF geschaffen wurden, z. B. das Fernsprechnet.
- d) Aus Computersicht niedrige Datenübertragungsraten.
- e) Modulation digitaler Signale.
- f) Starke internationale und nationale Normung.

Database and Expert Systems Applications Trevor Bench-Capon, Giovanni Soda, Min A. Tjoa, 1999-08-20. The Database and Expert Systems Applications (DEXA) conferences bring together researchers and practitioners from all over the world to exchange ideas, experiences and opinions in a friendly and stimulating environment. The papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems. DEXA covers a broad field and all aspects of database, knowledge base and related technologies and their applications are represented. Once again there were a good number of submissions: 241 papers were submitted and of these the programme committee selected 103 to be presented. DEXA 99 took place in Florence and was the tenth conference in the series following events in Vienna, Berlin, Valencia, Prague, Athens, London, Zurich, Toulouse and Vienna. The decade has seen many developments in the areas covered by DEXA, developments in which DEXA has played its part. I would like to express thanks to all the institutions which have actively supported and made possible this conference, namely

University of Florence Italy IDG CNR Italy FAW University of Linz Austria Austrian Computer Society DEXA Association In addition we must thank all the people who have contributed their time and effort to make the conference possible Special thanks go to Maria Schweikert Technical University of Vienna M Neubauer and G Wagner FAW University of Linz We must also thank all the members of the programme committee whose careful reviews are important to the quality of the conference
