Offshore Platform Integration and Floatover Technology Gengshen Liu, Huajun Li, 2017-05-31 This book discusses offshore platform integration technology focusing on the floatover methodology and its applications. It also addresses topics related to safety and cost effectiveness as well as ensuring the success of a project through careful planning and established detailed operation procedure working manuals which are rarely found in the published literature. Unlike other publications in this area, the book not only includes details of technology development but also presents real project cases in the discussion to make it more comprehensible. Each topic is illustrated with carefully created sketches to show the complex operation procedures.

Evolutionary Learning in Strategy-Project Systems Antonio Calabrese, Adil Eltigani, Paul Gardiner, Richard Kirkham, Lixiong Ou, Jonas Söderlund, Terence Williams, 2018-05-11 WHAT DOES A SUCCESSFUL KNOWLEDGE MANAGEMENT PRACTITIONER DO? *Evolutionary Learning in Strategy Project Systems* explores the gap between the theory and practice of knowledge management in organizations and analyzes how learning happens and how knowledge is created. The authors take a practitioner driven approach, one that unites organizational strategy with the learning of organizational lessons, the kind of knowledge management that enhances project performance and ultimately business success. Through a survey of the literature and an analysis of original case study research, *Evolutionary Learning in Strategy Project Systems* develops a model of learning capability that proceeds exactly as its title implies, not as a line but as a cycle from codifying individual knowledge and putting it into practice within a context that values social relationships and networks. The conclusions offered in this book build on the rethinking of project management literature in today's world, creating a strategy project learning model that not only improves current knowledge capabilities but also develops new ones.

Project Management by ICB4 - IPMA Bert Hedeman, Roel Riepma, 2023-09-21 IPMA observes an increasing number and importance of projects in business, public, and people's lives, also known as projectification. In the world of globalisation, an increasing number of organisations are working project based to cope with the challenges of modern times. Especially now, society is on the brink of such significant changes as global warming and artificial intelligence. Projects drive the development of new products and services, expansions, new capabilities, implementation of new strategies, and new generations of infrastructure and major maintenance and upgrade of existing facilities and infrastructure. This book provides a knowledge base for developing individual competencies for managing projects as described in the IPMA Individual Competence Baseline version 4, which encompasses Perspective competencies, People competencies, Practice competencies. As projects become increasingly important, we must continue to realise that projects begin and end with people and that their competent performance within the broader context of the environment is at the heart of any successful project. In this book, theories and practices for all ICB4 competencies are described. They are logically sequenced, explained, and enriched with practical approaches which can be learned and applied in the daily project management practice. As such, it aligns entirely with IPMA's vision to strengthen competence across society to enable a world in which all projects succeed. This book also supports obtaining an IPMA
