G., 2021-11

ATTENTION The problems presented in this series of workbooks are really challenging and have been included in real tests for contestants of Mathematical Olympiads for schoolchildren in Russia If you are looking for problems with a conventional level that does not require much effort to solve them we recommend that you DO NOT BUY THIS BOOK Seriously DO NOT BUY THIS BOOK Please DO NOT BUY THIS BOOK Since you will not like it you will not take advantage of it properly and you will surely give it a low rating But if what you are looking for is to refine your mathematical skills and you are not satisfied with the level reached in the usual preparation of your school and you want a greater challenge then THIS BOOK IS FOR YOU And we assure you that you will love it let us know in the comments Mathematical Olympiads for Elementary School 1 First Grade My First Book of Mathematical Olympiads Workbook Plus NEW NEW NEW The Mathematical Olympiads for the First Grade of Elementary School discussed here are none other than the Mathematical Olympiads for Schoolchildren Unikum which are held every year in the city of Lipetsk Russia since 2010 and organized by the Faculty of Physics Mathematics and Computer Science of Lipetsk State Pedagogical University and the Center for Continuing Education of Children Strategy Likewise these Olympiads consist of two rounds a qualifying round and a final round both consisting of a written exam The problems included in this book correspond to the final round of these Olympiads The present edition called Workbook Plus seeks to consolidate the mathematical skills acquired with the previous workbook since it includes new variants of problems as well as more challenging tasks In this workbook has been compiled all the Olympiads held during the years 2011 2020 and is especially aimed at schoolchildren between 6 and 7 years old with the aim that the students interested either in preparing for a math competition or simply in practicing entertaining problems to improve their math skills challenge themselves to solve these interesting problems or it could even be used for a self evaluation in this competition trying the student to solve the greatest number of problems in each exam in a maximum time of 1 hour 10 minutes It can also be useful for teachers parents and math study circles The book has been carefully crafted so that the student can work on the same book without the need for additional sheets what will allow the student to have an orderly record of the problems already solved Each exam includes a set of 8 problems from different school math topics To be able to face these problems successfully no greater knowledge is required than that covered in the school curriculum however many of these problems require an ingenious approach to be tackled successfully Students are encouraged to keep trying to solve each problem as a personal challenge as many times as necessary and to parents who continue to support their children in their disciplined preparation Once an answer is obtained it can be checked against the answers given at the end of the book

Mathematical Olympiads for Beginning Students 1 Michael C. G., 2021-02-26 Mathematical Olympiads for Beginning Students The Zeroth Book for Elementary Schoolers is an initiative that arises at the suggestion of parents and teachers to want to count on a practical study material for the training of future Math Olympians who currently have nascent math skills This workbook covers a complete training program for beginners in five volumes where each volume corresponds to a specific level of difficulty and is especially aimed at elementary school children between 6 and 11 years old with little or no experience in Math Olympiads who seek to strengthen their math skills and become a Math Olympian It may even be of great help for beginners in math for whom it may be their first workbook on the subject This volume includes the first level of the training program which consists of a set of 10 exams where each exam consists of 8 problems inspired by problems from Math Olympiads around the world This workbook has been carefully designed so that the student can solve each of the problems in the same book without having to resort to additional sheets thus having a complete and orderly record of all problems already solved At the end of the book the student will find the answers to all the problems proposed in this volume It is worth mentioning that this series of workbooks is a sequential preparation material that is anyone who begins with this training program is recommended to start from the first volume without skipping any of them in this way the students will experience the gradual improvement of their math skills evidencing their progress continuously Likewise students are suggested to carry out the following training scheme between 6 and 7 years old up to volume 2 between 7 and 8 years up to volume 3 between 8 and 9 years old up to volume 4 between 9 and 11 years old up to volume 5 It is important to clarify that what is suggested above is only referential as it is the minimum required for those ages however students are always encouraged to continually overcome themselves and face increasingly higher levels of difficulty For the success of this training program the essential presence of a guide tutor or parent is recommended during the learning process of the student so that they can be guided in the face of doubts and encouraged in the face of obstacles that may arise So students are encouraged to start their training as soon as possible and become a successful contestant in Math Olympiads and parents are encouraged to ensure and closely monitor the proper preparation of their children
