**Critical Intercultural Pedagogy for Difficult Times** Prue Holmes, John Corbett, 2022-07-21 This collection lends a critical decolonising lens to intercultural communication research, bringing together perspectives on how forms of education embedded in the arts and humanities can open up intercultural understanding among young people in conditions of conflict and protracted crises. The book draws on case studies from a range of educational contexts in the Global South which engage in creative arts methodologies to foreground decolonising approaches to intercultural communication in which researchers question their own power in the research process. The volume offers intercultural resources that can be used by researchers and community support groups to foster active intercultural communication, dialogue, participation and responsibility among young people in these settings and those who may be marginalised from them. The collection also highlights the reflexive accounts of researchers working in a transnational interdisciplinary and multilingual research network and the subsequent opportunities and challenges of working in such networks. Advocating for intercultural understanding among young people in higher education and a greater focus on social justice in intercultural communication research, this book will be of interest to students and researchers in applied linguistics, language education, intercultural education and multilingualism.

Sociocultural Theory and Language Learning as Performance John R. Haught, 2018-11-19 The author leads us on a journey of his years teaching additional languages through the use of performing arts. Drama, theater, games, music and other performance activities promote language use in authentic and engaging ways that differ from typical classroom activities and allow the language learners to have fun as they solve challenges in the target language. Drawing on the work of Lev Vygotsky and Sociocultural Theory, he demonstrates how learning is social and how learners create their knowledge by working with each other. Drama and creative arts are a powerful means for teaching and learning language because of the emotional support and encouragement it entails. He shows

how performing arts engage learners intellectually physically and emotionally while offering supports and scaffolds that lead to powerful learning outcomes He has effectively used these techniques with children and adults both at home and abroad in many different cultures and settings and argues that anyone can use these learning strategies to augment their teaching
