Barton, 2007 This book deals with the rising epidemic of illegal drug use and its relation to governmental policies Drug trafficking in the United States has become a significant problem both within the country and from foreign sources The development of international drug policies can prove difficult as other countries exhibit different national policies goals and concerns Terrorist funding is yet another threat resulting from drug trafficking activity      Human Behavior in the Social Environment Rudolph Alexander, 2010 Human Behavior and the Social Environment A Macro National and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment The course is offered usually over two semesters with one focusing on micro issues how the individual develops in relation to their social environment on an individual family and group level The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions community and the government This book is intended for the second sequence of the course It takes a unique approach by incorporating international issues of globalization which has been an emerging issue in social work Although it takes this unique perspective it still covers the basics of macro social work on a national level Other important areas that are not well represented in competing texts includes coverage of rural issues the impact of hurricane Katrina on social and community resources human rights and social justice the increasing impact of increasing rates of incarceration and a special section focusing on crisis theory This book has a number of key selling points They include A broad national and international perspective A timely approach that examines issues such as rural communities the impact of disaster on communities and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master s level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course They include End of chapter discussion questions Instructor s manual featuring powerpoint slides and a test bank Student study site for recommended reading chapter summaries and flash cards      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1983

**Reducing School Shootings** William H. Jaynes, 2021-02-01 This book calls for a multidimensional and comprehensive approach to reduce the number of school shootings rather than the simplistic unidimensional strategy that is commonly advocated Based on meta analyses examining which variables are most often related to positive changes in violent student behavior it also integrates other research and historical trends in order to formulate recommendations regarding how to reduce school shootings The topic of school shootings is one of the most vital issues in society today because 1 schools should be the safest places on Earth for children 2 if students do not feel safe they are not going to learn very well in school and 3 it is of such great concern to parents and society at large as evinced by the degree of news coverage that school shooting incidents receive Sadly despite the gravity of the problem many people tend to either respond in an emotional way or propose simplistic solutions Gun control legislation alone will not solve the problem instead it calls for a multi disciplinary and multifaceted approach involving parents teachers schools and healthcare This book investigates the status quo goals and solutions pursuing a fact based approach This book is of special interest to the academic community national leaders and other policymakers It is also suitable for courses on education psychology sociology criminal justice and other areas of law It will also appeal to the general audience

**The Educator's Guide To Substance Abuse Prevention** Sanford Weinstein, 2012-11-12 The Educator's Guide to Substance Abuse Prevention is for educators and other school personnel who are concerned about student drug use and school violence It will help them to appreciate and use their humanity professional skills educational ideals and the school curriculum as tools for substance abuse prevention Teachers concerns are addressed in several ways First the text provides a guide through which they may resolve personal and professional concerns about the commitments limits and boundaries of their working relationships with students Second it describes tasks that teachers can perform and mental health issues they can address in creating classroom policies procedures and rules to promote healthful learning activity in the classroom Third the author summarizes and interprets research and theory about substance abuse as they apply specifically to educational prevention and to professional teaching practice arguing that classroom management strategies learning activities and social interaction are a teacher's primary

tools of prevention and showing how teachers may use these tools in any curricular area and without direct reference to drugs. A highlight of this text is its emphasis on helping teachers to explore drug related issues from within the context of their own curricular specialties and to integrate substance abuse prevention with the curriculum in many school subjects including the arts, literature, social studies, history, government, science, and culture. Action oriented prevention strategies based on these content areas are suggested. The Educator's Guide to Substance Abuse Prevention focuses primarily on teaching, learning, and prevention rather than on information about drugs. It helps teachers to better use what they already do know and are in order to respond competently, responsibly, and with sensitivity to the needs of their students. It attends to the needs of teachers who do prevention work and the needs of children who are the target of prevention efforts. It describes student disappointment and disillusionment with family, school, and community as sources of risk and the legitimate domain in which teachers may serve a curative role. It provides extensive coverage of historical, social, and cultural issues related to substance abuse and school violence and alerts teachers to the risk to children posed by extremist adult groups, prominent negative role models, popular culture, and peer pressure. *Drugs, the Brain, and Behavior* John Brick, Carlton K.

Erickson, 2013-06-26 Explore the brain and discover the clinical and pharmacological issues surrounding drug abuse and dependence. The authors, research scientists with years of experience in alcohol and drug studies, provide definitions, historic discoveries about the nervous system, and original eye-catching illustrations to discuss the brain-behavior relationship, basic neuroanatomy, neurophysiology, and the mechanistic actions of mood-altering drugs. You will learn about how psychoactive drugs affect cognition, behavior, and emotion; the brain-behavior relationship; the specific effects of major addictive and psychoactive drug groups; new definitions and thinking about abuse and dependence; the medical and forensic consequences of drugs use. *Drugs, the Brain, and Behavior* uses a balance of instruction, illustrations, and tables and formulas that will give you a broad, lasting introduction to this intriguing subject. Whether you're a nurse, chemical dependency counselor, psychologist, or clinician, this book will be a quick reference guide long after the first reading. [On the Moral Right to Get High](#) Rob Lovering, 2025-06-29 Is getting high immoral? In this book, Rob Lovering defends the claim that it is not. More specifically, he argues that recreational drug use, of which getting high is a token, is neither intrinsically nor generally extrinsically immoral. In other words, he contends that recreational drug use is neither immoral in and of itself nor generally immoral due to an immoral-making factor with which it may be contingently linked, e.g., harm. Lovering does so by offering two arguments for recreational drug use: *sua facie* all things considered, moral permissibility; and critiquing twenty-four arguments for its immorality. Meant to be a companion to Lovering's *A Moral Defense of Recreational Drug Use* (Palgrave Macmillan, 2015), which was written for a general audience, this book is written for an academic, specifically philosophical, audience and explores recreational drug use in a deeper, more philosophically and empirically rigorous way.
