Simona Azzali,Silvia Mazzetto,Attilio Petruccioli,2021-04-20 This publication aims to investigate the nature of social life in

public and urban spaces in the cities of the Middle East considering the value of environmental approaches It aims to develop a better understanding of the patterns of social interactions and activities in public places which have been influenced by cultural heritage values Sustainable and livable open spaces can help in improving living conditions in cities Public spaces are relevant as they satisfy many human needs In public spaces people interact and meet people with different cultures and social backgrounds can communicate and learn from each other in social and spontaneous ways However decision makers tend to forget the value of public spaces especially in the absence of a national regulatory framework in emerging globalized cities The book provides a multi disciplinary approach in reading the characteristics and values of public spaces in the emerging cities of the Middle East *The New Arab Urban* Harvey Molotch, Davide Ponzini, 2019-02-05 Cities of the Arabian Peninsula reveal contradictions of contemporary urbanization The fast growing cities of the Persian Gulf are whatever else they may be indisputably sensational The world s tallest building is in Dubai the 2022 World Cup in soccer will be played in fantastic Qatar facilities Saudi Arabia is building five new cities from scratch the Louvre the Guggenheim and the Sorbonne as well as many American and European universities all have handsome outposts and campuses in the region Such initiatives bespeak strategies to diversify economies and pursue grand ambitions across the Earth Shining special light on Dubai Abu Dhabi and Doha where the dynamics of extreme urbanization are so strongly evident the authors of *The New Arab Urban* trace what happens when money is plentiful regulation weak and labor conditions severe Just how do authorities in such settings reconcile goals of oft claimed civic betterment with hyper segregation and radical inequality How do they align cosmopolitan sensibilities with authoritarian rule How do these elite custodians arrange tactical alliances to protect particular forms of social stratification and political control What sense can be made of their massive investment for environmental breakthrough in the midst of world class ecological mayhem To address such questions this book s contributors place the new Arab urban in wider contexts of trade technology and design Drawn from across disciplines and diverse home countries they investigate how these cities import projects plans and structures from the outside but also how increasingly Gulf originated initiatives disseminate to cities far afield Brought together by noted scholars sociologist Harvey Molotch and urban analyst Davide Ponzini this timely volume adds to our understanding of the modern Arab metropolis as well as of cities more generally Gulf cities display development patterns that however unanticipated in the standard paradigms of urban scholarship now impact the world **The Report: Dubai 2015** Oxford Business Group, 2011-01-12 Already a regional and global centre for business and finance Dubai s reputation has been bolstered by the MSCI s decision to upgrade the UAE from frontier to emerging market status in 2014 while the emirate s successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors Construction is thriving once again driven in large part by strong retail sector growth with various projects including plans for the world s largest mall indicating that the sector will maintain its position as the emirate s biggest GDP contributor moving forward The transport and logistics

framework is set for major expansion in the coming years as well furthering cementing the emirate's status as a leading transport and logistics hub not just regionally but globally too. The continued development of Dubai's retail and hospitality offerings alongside the upgrades to its airports should help to ensure robust growth in visitor numbers from both the region and further afield.

Desert Paradises Julian Bolleter, 2019-03-29 *Desert Paradises: Surveying the Landscapes of Dubai's Urban Model* explores how designed landscapes can play a vital role in constructing a city's global image and legitimizing its socio political hierarchy. Using the case study of Dubai Bolleter explores how Dubai's rulers employ a paradisiacal image of greening the desert in part as a tool for political legitimization. Bolleter also evaluates the designed landscapes of Dubai against the principles of the United Nations and the International Federation of Landscape Architects and argues that what is happening in Dubai represents a significant discrepancy between theory and practice. This book offers a new perspective on landscape design that has until now been unexplored. It would be beneficial to academics and students of geography landscape architecture urban design and urban planning particularly those with an interest in Dubai or the many cities in the region that are experiencing Dubaiification.
