the wrong direction America is at the edge a critical place at which we can either renew and revitalize or give in and lose that most precious American ideal democracy and along with it the freedom fairness and opportunities it assures Democracy's Edge is a rousing battle cry that we can and must act now From Jefferson to Eisenhower presidents from both parties have warned us of the danger of letting a closed narrow group of business and government officials concentrate power over our lives Yet today a small and unrepresentative group of people is making vital decisions for all of us But this crisis is only a symptom Lapp argues It's a symptom of thin democracy something done to us or for us not by or with us Such democracy is always at risk of being stolen by private interests or extremist groups left and right But there is a solution The answer says Lapp is Living Democracy a powerful yet often invisible citizens revolution surging in communities across America It's not random disjointed activism but the emergence of a new historical stage of democracy in which Americans realize that democracy isn't something we have but something we do Either we live it or lose it says Lapp

*Evaluating Sustainable Development* Peter S. Brandon, Patrizia Lombardi, 2009-02-18 Sustainable development has been characterised by an emphasis on environmental issues and an ad hoc approach to structuring the subject which hinders the development of knowledge in a systematic way The built environment contributes significantly to the environment but is also one of the major factors in determining whether a community is sustainable in the longer term A structure is required which aids definition provides a common set of values establishes measurement methods to define progress and suggests a management system and decision protocol which enables practitioners to engage and use the resultant structures and information This book provides a suggested structure in which all aspects of sustainable development can be included together with a set of evaluation techniques which can be used within the structure to provide assistance to decision making
