Database Systems For Advanced Applications '91 - Proceedings Of The 2nd International Symposium On Database Systems For Advanced Applications Akifumi Makinouchi, 1992-09-21 This book provides an authoritative overview of the global development of surgical paediatrics Biographical accounts of key people who developed this relatively new specialty many of whom are now household names are presented The compendium also acknowledges the enormous contribution of imaging ultrasound MRI and PET scans minimal invasive surgery and fetal surgery as well as the role of related journals and associations in the progress of surgical paediatrics Many of the contributors have been instrumental to the development of surgical paediatrics in their respective countries and have considerable worldwide influence on the management of children requiring surgical care Through their valuable insight and first hand experience this book not only shines a light on the past achievements of previous generations of paediatric surgeons but also serves as a model to encourage future generations to do likewise

Database and Expert Systems Applications Heinrich C. Mayr, Jiri Lazansky, Gerald Quirchmayr, Pavel Vogel, 2003-06-29 th DEXA 2001 the 12 International Conference on Database and Expert Systems Applications was held on September 3 5 2001 at the Technical University of Munich Germany The rapidly growing spectrum of database applications has led to the establishment of more specialized discussion platforms DaWaK conference EC Web conference and DEXA workshop which were all held in parallel with the DEXA conference in Munich In your hands are the results of much effort beginning with the

preparation of the submitted papers The papers then passed through the reviewing process and the accepted papers were revised to final versions by their authors and arranged with the conference program All this culminated in the conference itself A total of 175 papers were submitted to this conference and I would like to thank all the authors They are the real base of the conference The program committee and the supporting reviewers produced altogether 497 referee reports on average of 2.84 reports per paper and selected 93 papers for presentation Comparing the weight or more precisely the number of papers devoted to particular topics at several recent DEXA conferences an increase can be recognized in the areas of XMS databases active databases and multi and hypermedia efforts The space devoted to the more classical topics such as information retrieval distribution and Web aspects and transaction indexing and query aspects has remained more or less unchanged Some decrease is visible for object orientation

Database and Expert Systems Applications Abdelkader Hameurlain, Stephen W. Liddle, Klaus-Dieter Schewe, Xiaofang Zhou, 2011-08-19 This book constitutes the refereed proceedings of the 22 International Conference on Database and Expert Systems Applications DEXA 2011 held in Toulouse France August 29 September 2 2011 The 52 revised full papers and 40 short papers presented were carefully reviewed and selected from 207 submissions The papers are organized in topical sections on query processing database semantics skyline queries security and privacy spatial and temporal data semantic web search storage and search web search data integration transactions and optimization and web applications

Database Systems For Advanced Applications '95 - Proceedings Of The Fourth International Conference Wang Ling Tok, Yoshifumi Masunaga, 1995-03-31 This volume contains three keynote papers and 51 technical papers from contributors around the world on topics in the research and development of database systems such as Data Modelling Object Oriented Databases Active Databases Data Mining Heterogeneous Databases Distributed Databases Parallel Query Processing Multi Media Databases Transaction Management Systems Document Databases Temporal Databases Deductive Databases User Interface and Advanced Database Applications

Database and Expert Systems Applications A Min Tjoa, Isidro Ramos, 2012-12-06 The Database and Expert Systems Application DEXA conferences are mainly oriented to establish a state of the art forum on Database and Expert System applications But Practice without Theory has no sense as Leonardo said five centuries ago In this Conference we try a compromise between these two complementary aspects A total of 5 sessions are application oriented ranging from classical applications to more unusual ones in Software Engineering Recent research aspects in Databases such as activity deductivity and or Object Orientation are also present in DEXA 92 as well as the implication of the new data models such as OO Model Deductive Model etc included in the Modelling sessions Other areas of interest such as Hyper Text and Multimedia application together with the classical field of Information Retrieval are also considered Finally Implementation Aspects are reflected in very concrete fields A total of of nearly 200 papers submitted from all over the world were sent to DEXA 92 Only 90 could be accepted A Poster session has also been established DEXA 90 was held in Vienna Austria DEXA 91 in Berlin Germany and

DEXA 92 will take place in Valencia Spain where we are celebrating the discovery of the New World just five centuries ago in Leonardo's age. Both the quality of the Conference and the compromise between Practice and Theory are due to the credit of all the DEXA 92 authors. *Mobile Computing: Concepts, Methodologies, Tools, and Applications* Taniar, David, 2008-11-30. This multiple volume publication advances the emergent field of mobile computing offering research on approaches, observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers. Provided by publisher. *Grundkurs Datenbankentwurf* Helmut Jarosch, 2016-02-26. Das Buch beschreibt den Entwurf datenbankgestützter Anwendungssysteme. Es nimmt den Leser an die Hand und führt ihn im Schrittempo zum Ziel. Das gelingt durch eine konsequente Beispielorientierung und eine gute Verständlichkeit. Unterstützt wird der Leser zusätzlich durch Online Begleitmaterial. Schritt für Schritt werden alle Etappen von der Analyse der Realität, die im Datenmodell abgebildet werden soll, bis hin zur endgültigen Datenbankstruktur an einem durchgehenden Beispiel beschrieben. Besonders hilfreich sind die vielen illustrativen Anwendungsbeispiele aus verschiedenen Unternehmensbereichen und aus dem Alltagsleben, die in der 4. Auflage auf die neuesten Programmversionen aktualisiert wurden. Dieses Buch eignet sich für Studierende und Praktiker gleichermaßen vor allem für Informatiker, Wirtschaftsinformatiker und Betriebswirte. *Database Systems for Advanced Applications '97* Rodney Topor, Katsumi Tanaka, 1997. This volume contains the proceedings of the Fifth International Conference on Database Systems for Advanced Applications DASFAA '97. DASFAA '97 focused on advanced database technologies and their applications. The 55 papers in this volume cover a wide range of areas in the field of database systems and applications, including the rapidly emerging areas of the Internet, multimedia and document database systems, and should be of great interest to all database system researchers and developers and practitioners. *Database and Expert Systems Applications* Vladimir Marik, Jiri Lazansky, 1993-08-25. This volume constitutes the proceedings of the 4th International Conference on Database and Expert Systems Applications DEXA held in Prague, Czech Republic, in September 1993. Traditionally, the objective of the DEXA conferences is to serve as an international forum for the discussion and exchange of research results and practical experience among theoreticians and professionals working in the field of database and artificial intelligence technologies. Despite the fact that in the conference title the applications aspect is mentioned explicitly, the theoretical and the practical points of view in the field are well balanced in the program of DEXA 93. The growing importance of the conference series is outlined by the remarkably high number of 269 submissions and by the support given by renowned organizations. DEXA 93 is held for the first time outside the former GDR in an East European country and is essentially contributing to the advancement of the East-West scientific cooperation in the field of database and AI systems. This proceedings contains the 78 contributed papers carefully selected by an international program committee with the support of a high number of subreferees. The volume is organized in sections on data models, distributed databases, advanced database aspects, database optimization and performance evaluation, spatial and geographic databases, expert

systems and knowledge engineering legal systems other database and artificial intelligence applications software engineering and hypertext hypermedia and user interfaces

Recovery in Parallel Database Systems Svein-Olaf Hvasshovd, 2013-11-11 The relational DBMS technology is a success in the commercial market This success has led to the use of DBMS technology in application environments requesting their traditional virtues but at the same time adding new requirements such as Very high transaction rates real time transaction response and continuous availability New multi processor hardware architectures lay the foundation making it possible to meet these requirements This book presents and analysis in a systematic way the main recovery approaches for centralised DBMSs developed over the last two decades in particular to how well they fulfil the requirements for availability and soft real time response The analysis relates specifically to approaches used in current commercial and research systems The element in particular lacking in the current methods is the ability to on line re establish the faulttolerance level automatically and without blocking A set of novel recovery methods for parallel DBM s based on multi computer shared nothing hardware is presented The recovery methods are intended to support Continuously available transaction services very high transaction loads and soft real time transaction response Dieses Buch gibt einen guten systematisch gegliederten Einblick in die ma geblichen Methoden des Recovery Wiederherstellung eines der wichtigsten Themen im Bereich des Handlings gro er Datenbanksysteme Dabei geht es darum wie die Verf gbarkeit korrekter Daten gew hrleistet sowie Transaktionen und nderungen von Daten hinsichtlich Echtzeit m glichst optimal bewerkstelligt werden k nnen Behandelt werden sowohl kommerzielle wie auch in der Forschung verwandte parallele Systeme

Database and Expert Systems Applications Dimitris Karagiannis, 2013-11-11 The Database and Expert Systems Applications DEXA conferences are dedi cated to providing an international forum for the presentation of applications in the database and expert systems field for the exchange of ideas and experiences and for defining requirements for the future systems in these fields After the very promising DEXA 90 in Vienna Austria we hope to have successfully established wjth this year s DEXA 91 a stage where scientists from diverse fields interested in application oriented research can present and discuss their work This year there was a total of more than 250 submitted papers from 28 different countries in all continents Only 98 of the papers could be accepted The collection of papers in these proceedings offers a cross section of the issues facing the area of databases and expert systems i e topics of basic research interest on one hand and questions occurring when developing applications on the other Major credit for the success of the conference goes to all of our colleagues who submitted papers for consideration and to those who have organized and chaired the panel sessions Many persons contributed numerous hours to organize this conference The names of most of them will appear on the following pages In particular we wish to thank the Organization Committee Chairmen Johann Gordesch A Min Tjoa and Roland Wag ner who also helped establishing the program Special thanks also go to Gabriella Wagner and Anke Ruckert Dimitris Karagiannis General Conference Chairman Contents Conference Committee

Interfaces to Database Systems

(IDS92) Richard Cooper, 2012-12-06 Despite the volume of research carried out into the design of database systems and the design of user interfaces there is little cross fertilization between the two areas The control of user interfaces to database systems is therefore significantly less advanced than other aspects of DBMS design As database functionality is used in a wider range of areas such as design applications the suitability of the user interface is becoming increasingly important It is therefore necessary to begin applying the knowledge developed by HCI researchers to the specialised domain of database systems This volume contains revised papers from the International Workshop on Interfaces to Database Systems held in Glasgow 1 3 July 1992 The workshop aimed to develop an interaction between the design of database systems and user interfaces It discussed both the production of interfaces tailored to particular applications and also more general systems within which interfaces can be developed Some of the papers concentrate on usability aspects some discuss different interface metaphors whilst others tackle the question of designing a general conceptual model The latter topic is of particular importance as it is only by achieving an abstract model of what the user understands to be in the database that the data can be associated with appropriate interface facilities Among the contents of the volume are integrated interfaces to publicly available databases database query interface for medical information systems an integrated approach to task oriented database retrieval interfaces GRADI a graphical database interface for a multimedia DBMS cognitive view mechanism for multimedia information systems a graphical schema representation for object oriented databases a conceptual framework for error analysis in SQL interfaces a browser for a version entity relationship database Interfaces to Database Systems IDS92 is unique in that it brings together a variety of approaches from the database and HCI research communities It will provide essential reading for researchers of database systems and also industrial developers of DBMS Data Warehousing and Analytics David Taniar, Wenny Rahayu, 2022-02-04 This textbook covers all central activities of data warehousing and analytics including transformation preparation aggregation integration and analysis It discusses the full spectrum of the journey of data from operational transactional databases to data warehouses and data analytics as well as the role that data warehousing plays in the data processing lifecycle It also explains in detail how data warehouses may be used by data engines such as BI tools and analytics algorithms to produce reports dashboards patterns and other useful information and knowledge The book is divided into six parts ranging from the basics of data warehouse design Part I Star Schema Part II Snowflake and Bridge Tables Part III Advanced Dimensions and Part IV Multi Fact and Multi Input to more advanced data warehousing concepts Part V Data Warehousing and Evolution and data analytics Part VI OLAP BI and Analytics This textbook approaches data warehousing from the case study angle Each chapter presents one or more case studies to thoroughly explain the concepts and has different levels of difficulty hence learning is incremental In addition every chapter has also a section on further readings which give pointers and references to research papers related to the chapter All these features make the book ideally suited for either introductory courses on data warehousing and data analytics or even for self

studies by professionals The book is accompanied by a web page that includes all the used datasets and codes as well as slides and solutions to exercises **Information Modelling and Knowledge Bases XXII** Anneli Heimbürger, 2011
