PART-A

Section - A (Reading)

Q.1 Read the following passage carefully:

1. Read the following passage and answer the questions given below:-

Somewhere in Siberia 40 million years ago the Sabre-toothed tiger flourished. It became extinct only about 10,000 years ago, and its descendants, the true tigers, began to extend their range, moving southward in search of more suitable habitats as successive phases of the Ice Age made Northern Asia uninhabitable.

Today, deep in the snow of the Soviet Far East, 200 tigers still roam, and a few thousands of its relatives patrol the surviving pockets of forests from India to Indonesia. Wherever the tiger lived, it exercised a deep and lasting effect on the indigenous people, who traditionally revered it as god and protector of the forest and coexisted with it in an atmosphere of mutual harmony and respect.

But Western civilisation has taken its toll on the tiger. Thousands were shot for sport, and much of their habitat has been destroyed to make way for the demands of industry and increasing population. Tigers have now reached a crisis. They face extinction if we do not recognise that recent conservation efforts have failed, and that the future of the tiger lies in the hands of the people whose land it shares. It's a pity that the tiger is India's national animal yet there are just about 1400 odd tigers left in our country.
