**Seigniorage** Jens Reich, 2024-11-15 In diesem Buch werden die Einnahmen aus der Währungsschöpfung durch eine Zentralregierung analysiert. Ausgehend von einer institutionellen Perspektive wird eine allgemeine Theorie der Seigniorage entwickelt. Indem drei Geldsysteme in der Wirtschaftsgeschichte und der Geschichte des wirtschaftlichen Denkens identifiziert werden, eine Warenwährung, eine Fiat-Währung und ein Kreditwährungssystem. Als solche bietet sie einen modernen analytischen Rahmen, um die Art der Einnahmen aus der Währungsschöpfung und ihre optimale Höhe zu analysieren, unabhängig davon, ob die Währung durch die Prägung von Münzen, den Druck und die Ausgabe von Papierscheinen, die Kreditvergabe an Privatpersonen oder eine Kombination davon ausgegeben wird. Die Ergebnisse dieser Analyse reichen über das unmittelbare Thema hinaus. Das Buch stellt eine Beziehung zwischen der Theorie der Seigniorage und der Staatsverschuldung, der Theorie des Zinssatzes, der optimalen Inflationsrate oder der Wirksamkeit und den Inflationsgrenzen von reinen Geldgeschäften her.

**Handbook of US Consumer Economics** Andrew Haughwout, Benjamin Mandel, 2019-08-12 Handbook of US Consumer Economics presents a deep understanding on key current topics and a primer on the landscape of contemporary research on the US consumer. This volume reveals new insights into household decision making on consumption and saving, borrowing and investing, portfolio allocation, demand of professional advice and retirement choices. Nearly 70% of US gross domestic product is devoted to consumption, making an understanding of the consumer a first order issue in macroeconomics. After all, understanding how households played an important role in the boom and bust cycle that led to the financial crisis and recent great recession is a key metric. Introduces household finance by examining consumption and borrowing choices. Tackles macro problems by observing new original micro data. Looks into the future of consumer spending by using data, not questionnaires.

**Inclusive Economic Theory** Ralph William (Bill) Pfouts, Steven Rosefielde, 2014-11-27 The goal of Inclusive Economics is to tie together various authoritative strands of contemporary economic theory into an easily comprehensible whole that illuminates the need for a broader approach to contemporary economic policymaking, undistorted by obsolete 18th century rationalist assumptions about utility, ethics, worthiness and traditional culture. This is accomplished by elaborating the rationalist competitive ideal along the optimizing lines pioneered by Paul Samuelson, neoclassical economics, plumbing modifications necessitated by Herbert Simon's realist concepts of bounded rationality and satisficing, refined further by applying a pragmatist outlook to probe the consequences of relaxing Enlightenment teleological, ethical, spiritual and cultural taboos. The exercise will explain why competitive market economies, guided by rational utility seeking, invariably are less productive, efficient, just and beneficent than most theorists concede and will illuminate the full range of interventions needed to achieve better outcomes. We call this program, in its entirety, Inclusive Economics, including the integration of micro and macroeconomics.

**The European Central Bank and the European Macroeconomic Constitution** Klaus Tuori, 2022-09-22 The book is about money, central banking and constitutions. It

explains how the European Central Bank was established to ensure stability and prosperity for the euro area. The ECB was guided and controlled by a coherent European Macroeconomic Constitution. However, this model has failed during recurring crises and the ECB has started to act as the euro area fire brigade. Consequently, it is pushing the boundaries of monetary policy and with that challenging the accountability mechanisms and fundamentally also the democratic legitimacy of the EMU. The book sheds light on this complex economic constitutional setting with a view on the future. The imbalance between various new operations and a single price stability objective is difficult to remedy. New objectives of financial stability, economic adjustment and environmental sustainability can cause fundamental ruptures between the ECB's formal role and its actions and they also dangerously overburden monetary policy moving forward with substantial risks.

Part II turns to the issue of income contingent loans (ICL) where the repayment in any year depends on the annual income of the individual. These loans have proven to be an especially effective way of financing higher education but there has been experimentation of the use of these loans in several other areas.
