Gender discriminations among young children in Asia Collectif, 2020-10-09 Subsequent to the demographic transition Asian countries have been experiencing deep rooted changes in family structures In this context the question of gender relations within the family and more generally within society is crucial in view of the increase in discriminatory practices toward women beginning at foetal conception and continuing through all stages of life Asia is the black continent for women Estimates place the deficit in the number of women in the world at between 60 and 100 million the vast majority of which is found on this continent This book focuses on the intensity of female discrimination from a demographic perspective in the earliest stages of life and more specifically around birth in China India Pakistan the Republic of Korea and Taiwan These societies share cultural characteristics that are not favourable to women patriarchal systems patrilineal families socialization processes encouraging the submission of wives to their husband s family etc In these societies a son is needed to perpetuate the family line and ensure social and biological reproduction of the family These are among the reasons why they share a strong son preference which is in some cases accentuated by economic constraints A son is generally the only person to support his parents in old age and as a rule help with work in the fields Moreover girls and women still occupy a marginal position in society whereas a male heir offers countless advantages

Socio-economic Mobility and Low-status Minorities Jacob Meerman, 2009-06-02 This book concentrates on ethnic minorities such as former slaves outcasts and indigenous peoples dispossessed of homeland These groups are universally without power usually undereducated and always victims of their fellow citizens The book asks why these socially excluded groups remain at the bottom of their social hierarchies as the poorest of the poor even in nations long committed to equal opportunity Their slow progress has four causes obviously discrimination and poor education but also low economic growth and cultural heritage Low growth limits revenues for schools as well as new job opportunities and perpetuates traditional exploitative social relations and customs Traumatic histories of enslavement or conquest may induce behaviours by victims that reduce upward mobility Together these four interacting variables suggest a mobility model that explains the impasse The book develops and applies this model to interpret and compare the mobility history of five stigmatized low status ethnic groups U S African Americans Japan s Burakumin Afro Cubans India s Dalits Untouchables and Bolivia s Highland Indians The book also compares actions by governments and the groups themselves to overcome barriers to progress including job quotas boycotts mass protests and the unique kangaroo courts of Japan s Burakumin Meerman s unusual cross disciplinary approach and fascinating comparative studies of success and failure will appeal to scholars development practitioners and advocates working on issues of discrimination poverty equity and inequality in an ethnic context
