Internationalisierung von F&E und Produktentwicklung Frederik Schlenker, 2013-11-21 V Vorwort Mein Interesse

am Themenkomplex Internationalisierung von Forschung und Entwicklung wurde maßgeblich durch die Mitarbeit in Projekten bei einem global operierenden Automobilhersteller in den Jahren 1993/94 geweckt. Nach Abschluss meines Studiums nahm ich eine Forschungstätigkeit in diesem Bereich auf. Die vorliegende Dissertation wurde größtenteils im Rahmen meiner Tätigkeit an der Forschungsstelle Internationales Management und Innovation der Universität Hohenheim ausgearbeitet. Diese Arbeit baut auf den Erkenntnissen des Forschungsprojekts RITC (Research and Innovation in Transnational Corporations) auf. Dieses Forschungsprojekt wurde von Prof. Dr. Gerybadze an der HSG Universität St. Gallen 1994 ins Leben gerufen und 1997 an der Forschungsstelle Internationales Management und Innovation der Universität Hohenheim unter meiner Mitarbeit abgeschlossen. Mein besonderer Dank gilt daher an dieser Stelle meinem Doktorvater Herrn Prof. Dr. Alexander Gerybadze, der es mir nicht nur ermöglichte, die vorliegende Arbeit fertigzustellen, sondern auch durch viele Anregungen diese Arbeit wesentlich mitgestaltete. Herrn Prof. Dr. Walter Habenicht danke ich für die Übernahme des Korreferats. Mein Dank gilt auch Herrn Prof. Dr. Helmut Krcmar für die Übernahme des Prüfungsvorsitzes. An dieser Stelle muß auch erwähnt werden, daß eine empirische Untersuchung in einem betriebswirtschaftlichen Fach außer dem Einsatz des Doktoranden auch die Mitwirkung und Offenheit der Gesprächspartner aus der Industrie erfordert. An dieser Stelle möchte ich daher allen für ihre Unterstützung und Bereitschaft danken.

Kooperation als Strategie technologischen Paradigmenwechsels Mathias Knappe, 2015-05-13 Mathias Knappe weist nach, dass die nachhaltigkeitsinduzierte Elektrifizierung des automobilen Antriebs existenzielle Gefährdungen für die etablierten Unternehmen der Automobilindustrie birgt, die sich gegenüber ihren Herausforderern explorationsbezogen in einer nachteiligen Ausgangssituation befinden. Dabei identifiziert er das reale Kooperationsniveau in Relation zu den umfangreichen Potenzialen kooperativer Exploration elektrischer Antriebe als gering, volatil und vor allem in Deutschland bisherig intrasektoral fokussiert. Dieses Verhalten geht am überwiegend intersektoralen Potenzial vorbei und lässt die bisherige Position als Eintrittskarte in einen neuen technologischen Zyklus ungenutzt.

Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union

David Turnock, 2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states. Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment (FDI) with decisions on

where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries **MotorBoating** ,2002-06 *The Adoption and Diffusion of Imported Technology* J.L. Enos,W.-H. Park,2018-10-29 This book first published in 1988 considers the problems that developing countries face when importing technology from abroad The major issues technical economic political are analysed in the case of one particular country Korea The book describes the negotiations with the foreign companies that controlled the desired technology the building of the plants the training of engineers and managers to replace expatriots the improvements of processes and products and the maintenance of efficient and profitable production In their research the authors were given access to information usually kept confidential government memoranda and minutes company contacts and records costs and prices The book also considers how typical of the developing countries Korea is and the authors make certain policy recommendations for the future *The Arms Production Dilemma* Randall Forsberg,1994 The studies show how military strategy planned forces and the age of systems in the current inventory affect the domestic demand for new production how the recent drop in domestic demand affects arms industries and the extent to which governments and firms in the arms producing nations are turning to exports to sustain the industries In the shrinking arms market of the post Cold War era countries with advanced arms industries face difficult choices concerning force size arms production arms export and defense industrial capacity This book explores the links among these issues through a detailed study of the combat aircraft industries in the United States Russia Britain France Germany Italy and Sweden the seven countries that develop produce and export all of the world s technologically advanced weapon systems The studies show how military strategy planned forces and the age of systems in the current inventory affect the domestic demand for new production how the recent drop in domestic demand affects arms industries and the extent to which governments and firms in the arms producing nations are turning to exports to sustain the industries Stunning changes in Russia s combat aircraft forces industry and strategy are detailed here for the first time as are expected future Russian combat aircraft exports to China Newly compiled data also show that in the United States and Russia and globally arms production for export will exceed production for domestic use for the first time in history starting in 1995 Arms production is thus increasingly dominated by commercial rather than security interests Ultimately at issue is whether governments will exploit the

opportunity offered by the dramatic post Cold War contraction of the world arms market to reduce their armed forces and constrain international arms trade while shrinking the arms industry or keep pushing arms exports that generate new threats and justify larger armed forces more arms production and bigger arms industries The Korean Automotive Industry, Volume 1 A. J. Jacobs, 2021-12-10 In 1962 South Korea assembled just 1 100 new automobiles By 1996 this total had soared to 2 812 714 What explains this remarkable growth The answer is complex and involves a combination of a supportive State timely technology alliances a skilled but historically low paid workforce aggressive pricing savvy entrepreneurs and fortuitous circumstances Despite this amazing ascent comparatively little has been written about the Korean auto industry in English In the first of a two volume set this 11 chapter book seeks to help fill this void by providing in depth examinations of all six of Korea's automakers from their beginnings through 1996 Uniquely written from the perspective of industry analysts at the time without knowledge of the Asian Fiscal Crisis the book should prove informative to practitioners scholars and students interested in automotive history international political economy Asian studies and more *Popular Science*, 1998

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European CE nations of Czechia East Germany Hungary Poland and Slovakia from 1989 onwards Enticed by relatively lower wage labour and significant government incentives the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations with production accelerating dramatically since 2001 As a result the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015 and alternatively in the CEE it increased by nearly 170% during this period Drawing on case studies of 25 current and former foreign run assembly plants the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift This book will expand the knowledge of policy makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business economic history political science and development

Markteintritts- und Marktbearbeitungsstrategien ausgewählter koreanischer PKW-Hersteller für Europa Tanja Bindatsch, 1998-01-13 Inhaltsangabe Einleitung Die Republik Korea S d Korea fortan Korea geh rt zu den dynamischsten Wirtschaftsnationen der Welt und zu der Gruppe der NICs die sich in den letzten Jahrzehnten zwischen die eigentlichen Entwicklungs lnder und die entwickelten Industrielnder geschoben haben Dies gilt sowohl f r die binnenwirtschaftliche Entwicklung des Landes als auch f r seinen au enwirtschaftlichen Aufstieg Das reale Wirtschaftswachstum von 7 1 % im Jahr 1996 zeigt den wirtschaftlichen Aufstieg Koreas Auf jeden der 45 Mio Einwohner entfiel ein BSP Anteil von 10 600 US Dollar Eine der Schl sselindustrien ist die koreanische Automobilindustrie die seit den letzten 15 Jahren einen mehr als beachtlichen Boom erlebt Obwohl die Kraftfahrzeugproduktion in Korea erst vor ca 35 Jahren begonnen hat ist das Land mittlerweile in die Gruppe der f hrenden Automobilnationen aufgestiegen 1996 stand Korea an f nfter Stelle der PKW Produktion Die Ums tze in der Automobilindustrie im Jahr 1995 betrugen 44 544 Mrd US

Dollar Der Beschäftigtenanteil der Automobilindustrie am Gesamtbereich des verarbeitenden Gewerbes lag bei 4,6 % oder 220 000 Personen Korea ist auch das erste Beispiel in der Geschichte der Weltautomobilindustrie wo Auslandsinvestitionen von Entwicklungsländern zur Errichtung von Produktionsstätten in Industrieländern z.B. Kanada und Deutschland eingesetzt wurden Vor diesem Hintergrund ist Korea ein interessantes Beispiel um den wirtschaftlichen Aufstieg der Automobilhersteller aufzuzeigen Dabei wird schwerpunktmäßig das Marktsegment der PKW untersucht weil vier von fünf in Korea hergestellten Automobilen PKW sind Da Hyundai Motor Co Kia Motors Co und Daewoo Motor Co fortan Hyundai Kia und Daewoo zusammen 88 % der PKW Produktion im Jahr 1996 auf sich vereinigen konnten werden ihre Strategien in dieser Arbeit näher untersucht Es ist anzumerken da es aus Deutschland sehr schwierig ist in koreanisch geschriebene aktuelle Informationen z.B. auch bei koreanischen Unternehmen in Europa zu gelangen Deshalb basiert diese Arbeit zwar nicht auf koreanischen Quellen sondern auf Übersetzungen dieser Quellen Im weiteren zeigt der theoretische Hintergrund die Einbettung der Markteintritts und Marktbearbeitungsstrategien im internationalen Marketing gefolgt von Erläuterungen zu den Strategien und ihren Elementen Daran schließt sich ein Abschnitt an der einen Überblick über die Entstehung und Entwicklung der koreanischen Marketing Issues in Transitional Economies Rajeev Batra, 2012-12-06 As the markets in transitional economies open and grow major challenges and opportunities arise for multinational firms entering these markets local firms facing these new competitors and policymakers seeking to increase the ability of all firms to compete fairly and efficiently Yet despite the important questions transition economies pose for policymakers and companies seeking to enter and compete in these new markets there has been a relative absence of systematic research on these concerns This book seeks to fill a gap in the existing literature by offering a pioneering and comprehensive examination of issues that have developed as markets in transitional economies become more deregulated and open The countries discussed include China the Czech Republic Hungary India Poland Romania Russia South Africa and South Korea The topics covered are divided into five main sections and the individual chapters are written by some of the world's leading academic experts on these issues Most of the authors draw from freshly collected data in new studies of consumers and/or firms in transitional economies After an opening section which discusses the marketing issues and challenges multinational and local firms face in transitional economies the next three sections offer detailed treatments of changing consumer behavior measuring and improving the marketing orientation of firms and implementing and managing distribution channels The fifth and final section is devoted to firm strategies and tactics examined variously from the perspective of multinational firms entering these new markets from the viewpoint of existing local firms facing new competitive challenges from global entrants and from the perspective of local firms seeking to establish themselves in foreign markets where they have not previously competed Most of the individual chapters are revised versions of papers originally presented at a conference sponsored by the William Davidson Institute which focuses on research related to emerging and transitional economies and have not previously appeared in published

form Thus the book is a unique collection of cutting edge scholarship on the various aspects of marketing in transitional economies It will prove valuable reading to academics policymakers and international business strategists *Cemeterians* Jack W.
